The Exploration of Time, Etc. [On Methods of Assessing the Age of Prehistoric and Historic Discoveries. With Illustrations.]. Robert Napier Clive BOWEN,1958   Codesign for Real-Time Video Applications Jörg Wilberg,1997-10-31 Codesign for Real Time Video Applications describes a modern design approach for embedded systems It combines the design of hardware software and algorithms Traditionally these design domains are treated separately to reduce the design complexity Advanced design tools support a codesign of the different domains which opens an opportunity for exploiting synergetic effects The design approach is illustrated by the design of a video compression system It is integrated into the video card of a PC A VLIW processor architecture is used as the basis of the compression system and popular video compression algorithms MPEG JPEG H 261 are analyzed A complete top down design flow is presented and the design tools for each of the design steps are explained The tools are integrated into an HTML based design framework The resulting design data can be directly integrated into the WWW This is a crucial aspect for supporting distributed design groups The design data can be directly documented an cross referencing in an almost arbitrary way is supported This provides a platform for information sharing among the different design domains Codesign for Real Time Video Applications focuses on the multi disciplinary aspects of embedded system design It combines design automation and advanced processor design with an important application domain A quantitative design approach is emphasized which focuses the design time on the most crucial components Thus enabling a fast and cost efficient design methodology This book will be of interest to researchers designers and managers working in embedded system design   ,   **The Exploration of Time, by R.
