The Dilemmas of Neo-Liberal Reform at Makerere University, 1989-2005** Mahmood Mamdani, 2007 *Scholars in the Marketplace* is a case study of market based reforms at Uganda's Makerere University With the World Bank heralding neoliberal reform at Makerere as the model for the transformation of higher education in Africa it has implications for the whole continent At the global level the Makerere case exemplifies the fate of public universities in a market oriented and capital friendly era The Makerere reform began in the 1990s and was based on the premise that higher education is more of a private than a public good Instead of pitting the public against the private and the state against the market this book shifts the terms of the debate toward a third alternative than explores different relations between the two The book distinguishes between privatisation and commercialisation two processes that drove the Makerere reform It argues that whereas privatisation the entry of privately sponsored students is compatible with a public university where priorities are

publicly set commercialisation financial and administrative autonomy for each faculty to design a market responsive curriculum inevitably leads to a market determination of priorities in a public university The book warns against commercialisation of public universities as the subversion of public institutions for private purposes Luther's Theology of the Cross Alister E. McGrath, 2011-03-21 Luther's Theology of the Cross represents a fully revised and updated edition of the classic 1985 text that expands on the author's ongoing research and reflects 25 years of Luther scholarship Rewritten and expanded edition of a highly acclaimed classic text Incorporates primary and secondary sources that have become available since the publication of the first edition Draws on advances in our understanding of the late medieval intellectual cultural and religious background of Luther's early development and the nature of Luther's doctrine of justification including the so called Finnish school many of which have not yet been incorporated into Luther scholarship Luther's theological breakthrough continues to be of central importance to Reformation Studies and the development of Protestantism Written by one of the world's leading Protestant theologians who is an authority on the development of the doctrine of justification His classic work *Iustitia Dei: A History of the Christian Doctrine of Justification* is now in its third edition 2005 **The President's Report to the Board of Regents for the Academic Year ...
