**Libraries and Society** Wendy Evans, David Baker, 2011-04-30 This book reviews both the historical and future roles that public private academic and special libraries have in supporting and shaping society at local regional national and international levels Globalisation economic turmoil political and ethnic tensions rapid technology development global warming and other key environmental factors are all combining in myriad and complex ways to affect everyone both individually and collectively Fundamental questions are being asked about the future of society and the bedrock organisations that underpin it *Libraries and Society* considers the key aspects of library provision and the major challenges that libraries however defined managed developed and provided now face and will continue to face in the future It also focuses on the emerging chapter in cultural economic and social history and the library's role in serving diverse communities

within this new era Looks at all types of library in a period of major and discontinuous change tackling the fundamental questions of the future of libraries in the context of major societal political and environmental issues Poses important questions for the profession and policy development Fills a major gap in literature recent discourse and debate on the future of democracy for example the library is rarely included      **The Sexual Organization of the City** Edward O.

Laumann,Stephen Ellingson,Jenna Mahay,Anthony Paik,Yoosik Youm,2005-08-01 We think of the city as a place where anything goes Take the sensational fantasies and lurid antics of single women on Sex in the City or young men on Queer as Folk and you might imagine the city as some kind of sexual playground a place where you can have any kind of sex you want with whomever you like anytime or anywhere you choose But in The Sexual Organization of the City Edward Laumann and company argue that this idea is a myth Drawing on extensive surveys and interviews with Chicago adults they show that the city is to the contrary a place where sexual choices and options are constrained From Wicker Park and Boys Town to the South Side and Pilsen they observe that sexual behavior and partnering are significantly limited by such factors as which neighborhood you live in your ethnicity what your sexual preference might be or the circle of friends to which you belong In other words the social and institutional networks that city dwellers occupy potentially limit their sexual options by making different types of sexual activities relationships or meeting places less accessible To explain this idea of sex in the city the editors of this work develop a theory of sexual marketplaces the places where people look for sexual partners They then use this theory to consider a variety of questions about sexuality Why do sexual partnerships rarely cross racial and ethnic lines even in neighborhoods where relatively few same ethnicity partners are available Why do gay men and lesbians have few public meeting spots in some neighborhoods but a wide variety in others Why are African Americans less likely to marry than whites Does having a lot of friends make you less likely to get a sexually transmitted disease And why do public health campaigns promoting safe sex seem to change the behaviors of some but not others Considering vital questions such as these and shedding new light on the city of Chicago this work will profoundly recast our ideas about human sexual behavior
