**Human Relationships** Steve Duck, 1986 While most introductory social psychology textbooks do an excellent job of outlining the field and presenting current research they often seem to be unrelated to real life because they undervalue the substructure of social behaviour our relationships with other people The intention of this unique book is to make the study of social psychology a living reflection of students everyday experiences through the study of relationships Human Relationships will not supplant the instructor s chosen introductory text but will instead supplement it to give students an exciting glimpse into the psychology of their own lives Professor Duck who has played a major international role in the establishment of the new science of personal relationships skilfully

interweaves current research on interpersonal emotions with traditional social psychology topics to demonstrate conclusively that relationships form the basis for our mental and physical well being Thus the book offers information to students about key areas of research in the field while asking them to relate it to their own lives and showing them its subtle interconnections with other areas of social psychology Chapters introduce questions frequently asked by undergraduates such as why some people are lonely or shy what is jealousy how do people fall in and out of love why some children are unpopular how children are affected by their parents divorce In addition the book includes sections on sociolinguistics and the role of speech styles in social behaviour non verbal communication social skills physician patient relationships the social psychology of death and bereavement social anxiety and the repair of deteriorating relationships Human Relationships gives strong teaching support to instructors by encouraging students to consider familiar emotions and experiences analytically and to interpret them through research An appendix contains library and research skills instruction thought exercises practical exercises and suggestions for further research Steve Duck has not only written a book that will stimulate and supplement students interest in social psychology but has also added the definitive text on personal relationships to the professional psychologist s library Understanding Personal Relationships Steve Duck, Daniel Perlman, 1985

the strategies that people use to mobilize support within particular relational contexts and the impact of people's daily life and work patterns on the need for and ability to mobilize support. The effect in turn of competence in support giving on the development and maintenance of interpersonal relationships is examined as are the possible negative consequences of particular kinds of support. Personal Relationships and Social Support brings together for the first time two strands of work on social support and the nature of interpersonal relationships which have tended to develop in isolation from each other. This path breaking book will be essential reading for all those interested in new developments in theory and research in the field of human relationships.

**Interpersonal Relationships and the Self-Concept** Brent A. Mattingly, Kevin P. McIntyre, Gary W. Lewandowski, Jr., 2020-05-20

This volume provides an overview of the theoretical and empirical work on relationship induced self concept change that has occurred over the last 10-15 years. The chapters in this volume discuss the foundations of relationship self change: how and when it occurs, how it influences relationship decisions and behavior, and how it informs and modifies subsequent knowledge structures, all examined over the course of the relationship cycle, i.e. initiation, maintenance, and dissolution. Additionally, this volume identifies novel applications and extensions of the relationship self change literature, including applications to health and behavior, intergroup relations, and the workplace. Among the topics discussed: Self disclosure in the acquaintance process, Commitment readiness, Bolstering attachment security through close relationships, Self concept clarity and self change, The role of social support in promoting self development, Relationship dissolution and self concept change, Intergroup and sociocultural factors of self expansion, Self concept change at work, Measurement of relationship induced self concept change. Interpersonal Relationships and the Self Concept serves both as a comprehensive overview of the existing empirical research as well as a roadmap for future research on self change, including a discussion of emerging theoretical frameworks. It will interest researchers focusing on romantic relationships, self and identity, and the intersection of self and relationships, spanning the disciplines of psychology, sociology, communication, and family studies.

Personal Relationships and Personal Networks Malcolm R. Parks, 2017-09-25

The effort to understand personal relationships has traditionally focused on the individual characteristics of participants. Personal Relationships and Personal Networks takes this analysis a step further, focusing on research linking participants' feelings and actions within a given personal relationship to the larger social context surrounding it. Author Malcolm R. Parks expands on the idea that the initiation, development, maintenance, and dissolution of relationships are inextricably connected to each participant's social network, a perspective that allows for a better appreciation of our connection to the world and a greater understanding of our significant power as social actors. This book offers a new way to consider basic notions about how relationships form, such as how particular people meet and how relationships are started. Among many findings, the volume demonstrates that individuals in relationships feel closer and generally more connected when they also have a greater amount of contact with the members of each other's personal networks, and when they believe that network members support their relationship.

Additional topics discussed include how this social context model is applicable to different types of relationships how participants interact with network members how social networks are involved in the deterioration of personal relationships and what drives change in relationships Students researchers and professionals in a wide variety of disciplines such as communication psychology sociology anthropology family studies clinical psychology public health nursing education and social work will find this book useful as will anyone seeking to better understand their own personal relationships
