Pension Privatization and Country Risk Ms. Maria Gonzalez, Davide Lombardo, Arnaldo López-Marmolejo, Mr. Alfredo Cuevas, 2008-08-01 This paper explores how privatizing a pension system can affect sovereign credit risk For this purpose it analyzes the importance that rating agencies give to implicit pension debt IPD in their assessments of sovereign creditworthiness We find that rating agencies generally do not seem to give much weight to IPD focusing instead on explicit public debt However by channeling pension contributions away from the government and creating a deficit of resources to cover the current pension liabilities during the reform's transition period a pension privatization reform may transform IPD into explicit public debt adversely affecting a sovereign's perceived creditworthiness thus increasing its risk premium In this light accompanying pension reform with efforts to offset its transition costs through fiscal adjustment would help preserve a country's credit rating
