*Social Space and Governance in Urban China* David Bray, 2022 Centered on the urban workplace the danwei workunit has been the fundamental social and spatial unit of urban China under socialism Not only was it the source of employment wages and other material benefits for the vast majority of urban residents it was also the institution through which the urban population was housed organized regulated policed educated trained protected and surveyed Furthermore as the basic unit of urban society each danwei became a community providing its members with identity a face and social belonging With particular focus on the link between spatial forms and social organization this book traces the origins and development of this critical institution up to the present day Recent economic restructuring has seen the danwei lose its dominant role yet its presence still influences the possibilities for urban transformation Moreover the author argues the new institutions emerging in its place display important characteristics of the old danwei system [Social Space and Governance in Urban China](#)

David Bray, 2005 The danwei workunit has been the fundamental social and spatial unit of urban China under socialism With particular focus on the link between spatial forms and social organization this book traces the origins and development of this critical institution up to the present day [The Politics of Community Building in Urban China](#) Thomas

Heberer, Christian Göbel, 2011-03-29 This book aims to make sense of the recent reform of neighbourhood institutions in urban China It builds on the observation that the late 1990s saw a comeback of the state in urban China after the increased economization of life in the 1980s had initially forced it to withdraw Based on several months of fieldwork in locations ranging from poor and dilapidated neighbourhoods in Shenyang City to middle class gated communities in Shenzhen the authors analyze recent attempts by the central government to enhance stability in China's increasingly volatile cities In particular they argue that the central government has begun to restructure urban neighbourhoods and has encouraged residents to govern themselves by means of democratic procedures Heberer and Göbel also contend that whilst on the one hand the central government has managed to bring the Party state back into urban society especially by tapping into a range of social groups that depend on it it has not however managed to establish a broad base for participation In testing this hypothesis the book examines the rationales strategies and impacts of this comeback by systematically analyzing how the reorganization of neighbourhood committees was actually conducted and find that opportunities for participation were far more limited than initially promised The book will be of interest to students and scholars of Chinese Studies Development Studies Urban Studies and Asian Studies in general [China's Urban Communities](#) Peter G. **Urban Village Redevelopment in Beijing, China** Ran Liu,2024-06-12 The book provides a multi stage assessment of the changing housing opportunities of migrant workers in the three stages of Beijing s urban village development emergence erasure and preservation The volume re theorizes Henry Lefebvre s notion of the right to the city as a largely property based concept that falls within the city s hybrid tenure matrix of varying degrees of tenure security and formality that is undergoing entrepreneurialization or gentrification This is another highly valuable contribution to China studies from the geographical perspective of the territorial politics at play in the process of urban village redevelopment which has fostered a new propertied landowning class as winners while moving low wage migrants The book takes the reader on a fascinating journey from peri urban villages to IT worker villages to artists villages revealing a restless landscape of urbanism and state centered governance as well as bottom up counterplots The fieldwork explores the contradictions of urban village redevelopment in Beijing On the one hand it is state dominated and yet creates new housing opportunities for migrants on the other it disrupts old orders but also encourages new forms of grassroots alliances The empirical studies of Beijing s urban villages enrich Henry Lefebvre s discourse on planetary urbanisation Gilles Deleuze and Felix Guattari s notion of the rhizome and Elinor Ostrom s ideas on the wise management of the commons

*China Constructing Capitalism* Michael Keith,Scott Lash,Jakob Arnoldi,Tyler Rooker,2013-09-23 China has

been growing at over ten per cent annually since 1978 but this has only come to very widespread notice in the past decade This received wisdom about China has been largely of two types both of which more or less understand China in the context of neoliberalism The more business or business studies oriented literature seems to argue that if China does not adapt the rule of clear and distinct property and contract law in short of Western institutions its economy will stall The second set of voices is more clearly from the left arguing that the Chinese economy and city is neo liberal For them China does not diverge widely from the Anglo American model that from 2008 has brought the world economy to its knees China Constructing Capitalism takes issue with these analyses The authors argue that it is not Western neo liberalism that is constructing the Chinese economy but instead that China is constructing its own version of capitalism The two central theses of their argument are economic life neo liberal economic life is individualized and disembedded while the China model is relational and situated urban change China has created a form of local state capitalism which stands in contrast to neoliberal versions of the city This book analyses China as a risk culture examining among others Chinese firms and political ties property development migrant urbanisms and share trading rooms It scrutinises the ever present shadow of the risk averse yet uncertainty creating state China Constructing Capitalism is a must read for social scientists policy makers and investors
