Constructing Global Challenges in World Politics Alina Isakova, Malte Neuwinger, Robin Schulze Waltrup, Oday Uraiqat, 2024-06-24 This

interdisciplinary book investigates the problematization of global challenges in world politics by analyzing what they are and how they come to be. Offering a conceptual framework including four modes of construction: universalizing, bundling, upscaling, and creating urgency, this book provides a heuristic method for understanding how the process of rendering an issue a global challenge unfolds. It examines the role of the global challenges discourse, which may either reinforce or challenge the dominant orders of world politics, such as the capitalist market-based system and the liberal international order. As a consequence, the global challenges discourse facilitates the emergence of new actors and policy fields. The book will be of interest to students, academics, and practitioners of global governance, international organizations, and more broadly, international political economy and international relations.

Social Problems Anna Leon-Guerrero, 2018-07-10 Empower your students to become part of the solution. The new Sixth Edition of Anna Leon Guerrero's *Social Problems: Community Policy and Social Action* goes beyond the typical presentation of contemporary social problems and their consequences by emphasizing the importance and effectiveness of community involvement to achieve real solutions. With a clear and upbeat tone, this thought-provoking text challenges readers to see the social and structural forces that determine our social problems, to consider various policies and programs that attempt to address these problems, and to recognize and learn how they can be part of the solution to social problems in their own community. More recent data and new data sources have been incorporated throughout, both in the main narrative and in the *Exploring Social Problems* features. New Voices in the Community: subjects on gender, work, and the economy, and war and terrorism appear in several chapters. New In Focus: topics include Black Lives Matter, assault weapons, and college drug problems. The chapter on gender has been substantially updated with new or expanded coverage of binary, cisgender, transgender, identification, gender nonconformity, discrimination, sexual misconduct on college campuses, and the rights of trans and intersex individuals. Other new or expanded coverage elsewhere includes economic anxiety, robotization in the workplace, white nationalists, feminist theories about race, fake news, net neutrality, community policing, gentrification, and segregation in U.S. cities, and the immigration and environmental policies of the Trump administration.

Social Constructionism Titus Hjelm, 2014-05-22 Social constructionism is one of the key ideas in the social sciences, offering different frameworks for understanding the human world. This dynamic text invites critical reflection on these questions and more, outlining the various ways that social constructionist theory has been utilized in the social sciences. Hjelm introduces the basic assumptions of social constructionism before examining the differences between various constructionist traditions and perspectives from Berger and Luckmann's sociology of knowledge to constructionist approaches in social psychology and discourse analysis. The Fallacy of Corporate Moral Agency David Rönnegard, 2015-05-12. It is uncontroversial that corporations are legal agents that can be held legally responsible, but can corporations also be moral agents that are morally responsible? Part one of this book explicates the most prominent theories of corporate moral agency and provides a detailed debunking of why corporate moral agency is a fallacy. This implies that talk of corporate moral responsibilities beyond the mere metaphorical is essentially meaningless. Part two takes the fallacy of corporate moral agency as its premise and spells out its implications. It shows how prominent normative theories within Corporate Social Responsibility, such as Stakeholder Theory and Social Contract Theory, rest on an implicit assumption of corporate moral agency. In this metaphysical respect, such theories are untenable. In order to provide a more robust metaphysical foundation for corporations, the book explicates the development of the corporate legal form in the US and UK, which displays how the corporation has come to have its current legal attributes. This historical evolution shows that the corporation is a legal fiction created by the state in order to serve both public and private goals. The normative implication for corporate accountability is that citizens of democratic states ought to primarily make calls for legal enactments in order to hold the corporate legal instruments accountable to their preferences.

Key Issues in Sustainable Development and Learning William Scott, Stephen Gough, 2004. This book presents seminal readings from existing literature alongside specially commissioned critical vignettes from leading thinkers with interests in sustainable development and learning. The book sets out to inform readers about the many perspectives that exist and to challenge assumptions they may have about both sustainable development and learning. Through the readings and vignettes, the book raises wide-ranging issues of how we choose to act. Following the format of its companion volume, *Sustainable Development and Learning*, framing the issues, the book builds on existing work across a number of fields as well as on original international research. *Key Issues in Sustainable Development and Learning* is a critical review, a major resource for anyone studying for masters degrees focusing on environment and sustainable development. It is also a valuable tool for professionals in both public and private sectors who are dealing with these issues daily. Bill and Steve's book for Routledge, *Sustainable Development and Learning*, framing the issues, is one of the academic sources cited by the United Nations in its draft international implementation scheme for the Decade of Education for Sustainable Development, which was launched by Kofi Annan last month.
