Classes, Power and Conflict Anthony Giddens,David Held,1982-05-13 In recent years a remarkable range of new work has been produced dealing with class inequalities the division of labor and the state In these writings scholars previously working in isolation from one another in sociology economics political science and history have found common ground Much of this work has been influenced by Marxist theory but at the same time it has involved critiques of established Marxist views and incorporated ideas drawn from other sources These developments have until now not been reflected in existing course texts which are often diffusely concerned with social stratification and lack reference to contemporary theory Classes Power and Conflict breaks new ground in providing a comprehensive introduction to current debates and contemporary research In also connects these to the classical sources concentrating particularly on Marx Lenin and Weber The book therefore offers a comprehensive coverage of materials for students who have little or no prior acquaintance with the field Each section of the book contains a substantial introduction explaining and expanding on the themes of the selections contained within that section Classes Power and Conflict can be expected to become the standard text for courses in sociology and political science

Family Theories James M. White,David M. Klein,2002-06-27 Praise for the First Edition This is an admirable text and sourcebook but also achieves the status of an intellectually challenging confrontation with the reader It is in many ways a model which many of us would be well advised to follow I wish I could have written it *British Journal of Developmental Psychology* This revision of a best seller remains the only single volume book to present family theory in a clear and approachable manner providing a thorough introduction to current theories about the family for both advanced undergraduate and beginning graduate students The authors incorporate a broad scope of work from different perspectives in surveying seven major theoretical frameworks developed by key social scientists to explain variation in family life This incisive New Edition examines the exchange symbolic interaction family developmental systems conflict feminist and ecological theoretical frameworks and presents a typology for analyzing and comparing the seven frameworks while providing direction for future theory development **The Melting Pot and the Altar** Richard M. Publication No. (OHDS). ,1981 Handbook of Interpersonal Commitment and Relationship Stability Jeffrey M. Adams,Warren H. Jones,2012-12-06 A fundamental assumption underlying the formation of our most important relationships is that they will persist indefinitely into the future As an acquaintanceship turns into a friend ship for example both members of this newly formed interpersonal bond are likely to expect that their interactions will become increasingly frequent diverse and intimate over time This expectation is perhaps most apparent in romantically involved couples who through a variety of verbal and symbolic means make explicit pledges to a long lasting relationship In either case it is clear that these relationships represent something valuable to the individuals in volved and are pursued with great enthusiasm Virtually all

close relationships are formed within the context of mutually rewarding interactions and or strong physical attraction between partners Friends and romantically involved couples alike are drawn to one another because of similarity of attitudes interests and personality and quite simply because they enjoy one another's company This enjoyment coupled with the novelty that characterizes new relationships almost makes the continuation of the relationship a foregone conclusion As relationships progress however their novelty fades conflicts may arise between partners negative life events may occur and the satisfaction that previously characterized the relationships may diminish

Landlords and Capitalists Maurice Zeitlin, Richard Earl Ratcliff, 2014-07-14 In 1974 Maurice Zeitlin published a seminal article in The American Journal of Sociology criticizing managerial theory and evidence which ended one era in the analysis of the large corporation's ownership and control and began a new one He called for research on the capitalist class that would reveal its inner structure particularly the interaction of family ties property and business leadership in the large corporation But despite the subsequent blossoming of studies of intercorporate and class power no one else has yet done the systematic empirical analysis he outlined This work is thus the first to explore the full panoply of intraclass relations interorganizational kinship economic and political within an actually existing dominant class Theoretically sensitive methodologically precise and historically grounded it aims to fill in the blank spots in our knowledge about how economic classes become social classes and how the latter in turn connect with other social forms This work is a sustained empirical analysis of Chile's dominant class But it does more than reveal that class's specific internal structure it also provides a coherent theory of the inner relations constituting any dominant class in a highly concentrated capitalist economy a methodological paradigm and an exemplary body of findings which can closely guide the study of other dominant classes especially in the advanced societies of the West Originally published in 1988 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
