The Socialist Industrial State Kevin P. Lane, David Lane, 2019-06-26 Before beginning the study of the social system I have chosen to call state socialism it is necessary to define the term and to describe the societies to which it is held to apply A society may be defined as a behavioural system having three components a distinct set of central or dominant value and beliefs a number of social institutions and patterns of interactions between individuals and institutions What then are the distinguishing features of state socialism The dominant values are those of Marxism Leninism and the peculiar institutions of the system stem from the state owned means of production which determine man's relationship to property The values laid down in the charter of the society are those of socialism that is a system of beliefs focused on the ultimate perfectibility of man on the determining influence of class forces operating through the laws of historical and dialectical materialism In state socialist societies the dominant institution is the Communist Party which is considered to lead the working class and provides an authoritative interpretation of the laws of historical development which in turn legitimate the Party's own political power The appellation state focuses on the central role played by government and Party institutions in the process of these societies not only do ownership and control of the means of production legally reside with the state but it has the authority to mobilise the population to achieve the goals defined in the official charter In the patterns of interactions between institutions the state government and ruling party plays a dominant role Let us now turn from analytical concepts to consider some historical generalisations

generalisations **The Socialist Industrial State** David Lane, 1978 *Taiwan's Development* Cal Clark, 1989-10-06
 Known as the Taiwan Miracle the Republic of China on Taiwan R O C has over the past thirty five years experienced one of the world's highest rates of economic growth Arguing that major theoretical frameworks for analyzing international political economy are often too simplistic in that they omit key factors or overly generalize from relationships found only in limited situations Clark uses a detailed case history of the R O C to suggest not only that development and dependency in contemporary society are extremely complex and indeterminate processes but that development in Taiwan deviates significantly from the postulates of the two leading paradigms of international political economy To go even further Clark states that Taiwan's economic growth and transformation resulted from its deviation from the normal dependency syndrome Indeed a development strategy based on economic flexibility and periodic regime change that has made this flexibility possible are hallmarks in Taiwan's success story The United States and other advanced industrial economies whose past successes have created economic and political barriers to future adaptation can be better understood in terms of the characteristics of R O C's development strategy Part I of the three part work focuses on environment first discussing various paradigms and theories about development and then presenting an historical overview of Taiwan The second part investigates Taiwan's international role political development and rapid economic growth The volume closes with a chapter devoted to the implications of the Taiwan experience and political economy paradigms Eight figures and thirty five tables illustrate facets of Taiwan's development including government structure indicators of agricultural development industrialization educational progress and export performance among others Because of the detailed presentations of political economy theories and their variants especially in relation to economic and political development in Taiwan this volume would be an excellent choice for courses in political economy developing societies Asian politics and international relations theory as well as libraries serving students in these areas Toward a Political Economy of Development Robert H.
