John Clare Simon Kövesi,2017-08-02 This book investigates what it is that makes John Clare s poetic vision so unique and asks how we use Clare for contemporary ends It explores much of the criticism that has appeared in response to his life and work and asks hard questions about the modes and motivations of

critics and editors Clare is increasingly regarded as having been an environmentalist long before the word appeared this book investigates whether this green rush to place him as a radical proto ecologist does any disservice to his complex positions in relation to social class work agriculture poverty and women This book attempts to unlock Clare s own theorisations and practices of what we might now call an ecological consciousness and works out how his ecocentric mode might relate to that of other Romantic poets Finally this book asks how we might treat Clare as our contemporary while still being attentive to the peculiarities of his unique historical circumstances

The Last Man Who Knew Everything Andrew Robinson,2023-05-09 No one has given the polymath Thomas Young 1773 1829 the all round examination he so richly deserves until now Celebrated biographer Andrew Robinson portrays a man who solved mystery after mystery in the face of ridicule and rejection and never sought fame As a physicist Young challenged the theories of Isaac Newton and proved that light is a wave As a physician he showed how the eye focuses and proposed the three colour theory of vision only confirmed a century and a half later As an Egyptologist he made crucial contributions to deciphering the Rosetta Stone It is hard to grasp how much Young knew This biography is the fascinating story of a driven yet modest hero who cared less about what others thought of him than for the joys of an unbridled pursuit of knowledge with a new foreword by Martin Rees and a new postscript discussing polymathy in the two centuries since the time of Young It returns this neglected genius to his proper position in the pantheon of great scientific thinkers
