Radio as Art Anne

Thurmann-Jajes, Ursula Frohne, Jee-Hae Kim, Maria Peters, Franziska Rauh, Sarah Schönewald, 2019-08-15 Acoustic signals voice sound articulation music and spatial networking are dispositifs of radiophonic transmission which have brought forth a great number of artistic practices Up to and into the digital present radio has been and is employed and explored as an apparatus based structure as well as an expanded model for performance and perception This volume investigates a broad range of aesthetic experiments with the broadcasting technology of radio and the use of radio as a means of disseminating artistic concepts With exemplary case studies its contributions link conceptual recipient response related and sociocultural issues to matters of relevance to radio art s mediation **Ubiquitous Musics** Marta García Quiñones, Anahid

Kassabian, Elena Boschi, 2016-02-17 Ubiquitous Musics offers a multidisciplinary approach to the pervasive presence of music in everyday life The essays address a variety of situations in which music is present alongside other activities and does not demand focused attention from sometimes involuntary listeners The contributors present different theoretical perspectives on the increasing ubiquity of music and its implications for the experience of listening The collection consists of nine essays divided into three sections Histories Technologies and Spaces The first section addresses the historical origins of functional music and the debates on how reproduced music including a wide range of styles and genres spread so quickly across so many environments The second section focuses on more contemporary sound technologies including mobile phones in India the role of visible playback technology in film and listening to portable digital players The final section reflects on settings such as malls stores gyms offices and cars in which ubiquitous musics are often present but rarely thought about This last section and ultimately the whole collection seeks to foster a wider understanding of listening practices by lending a fresh critical ear *The Limits of Meaning* Matthew Eric Engelke, Matt Tomlinson, 2006

Too often anthropological accounts of ritual leave readers with the impression that everything goes smoothly that rituals are meaningful events But what happens when rituals fail or when they seem meaningless Drawing on research in the anthropology of Christianity from around the globe the authors in this volume suggest that in order to analyze meaning productively we need to consider its limits This collection is a welcome new addition to the anthropology of religion offering fresh debates on a classic topic and drawing attention to meaning in a way that other volumes have for key terms like culture and fieldwork Spain Graham J.

Shields, 1994 Annotation In less than 20 years Spain has emerged from repression and dictatorship to become a largely stable and sophisticated modern industrial economy This reference provides annotated entries on works dealing with the history geography economy politics people culture customs religion and social organization of this fascinating country Also addressed are current living conditions including housing education the media the arts and industry Annotation copyright by Book News Inc Portland OR *Conditions of Violence* Christian Gerlach, 2024-11-04 Mass violence comes not only from states but also from people By analyzing mass violence as social interaction through survivor accounts and other sources this book presents understudied agents aims and practices of direct violence and ways of action of those under persecution

Sound history examining the noises of mass violence and persecution is particularly telling about such practices This volume shows that violence can become socially hegemonic and some people claim a freedom to kill as a political right To scrutinize indirect violence which is often imperialist in character and claims many victims the book proposes the concept of conditions of violence These conditions are produced by definable groups of actors and foreseeably harm definable groups which differs from the anonymous and static structural violence This is exemplified in a case study concerning famines in World War II and another on COVID 19 as mass violence Less global in character other case studies in this volume deal with Rwanda Bangladesh East Pakistan and the Soviet Union
