**Economic Wealth Creation and the Social Division of Labour** Robert P. Gilles, 2019-02-09 This is the second book of a two volume set that continues Adam Smith's work using the tools mathematical experimental and behavioural economists have developed since 1776 As in the first volume markets are not the central organising principle Instead attention centres on social institutions and the division of labour that they enable The book studies this via the endogenous division of labour that existing institutions help form The first book in the series examined this problem deeply resorting minimally to formal mathematical modelling the second volume is where the formal modelling blossoms General equilibrium theory meets network theory and receives a breath of fresh air including a new viewpoint on economic inequality the newly resurgent bane of capitalism What I said for the first volume applies to this second volume equally if you care to understand the economy this book belongs to your bookshelf Dimitrios Diamantaras Temple University Philadelphia USA This textbook introduces and develops new tools to understand the recent economic crisis and how desirable economic policies can be adopted Gilles provides new institutional concepts for wealth creation such as network economies which are based on the social division of labour This second volume introduces mathematical theories of the endogenous formation of social divisions of labour through which economic wealth is created Gilles also investigates the causes of inequality in the social division of labour under imperfectly competitive conditions These theories frame a comprehensive innovative and consistent perspective on the functioning of the twenty first century global economy explaining many of its failings Suitable reading for advanced undergraduate MSc and postgraduate students in microeconomic analysis economic theory and political economy *Cultural and Social Division in Contemporary Japan* Yoshikazu Shiobara, Kohei Kawabata, Joel Matthews, 2019-07-30 The recent manifestation of exclusionism in Japan has emerged at a time of intensified neoliberal economic policies increased cross border migration brought on by globalization the elevated threat of global terrorism heightened tensions between East Asian states over historical and territorial conflicts and a backlash by Japanese conservatives over perceived historical apologism The social and political environment for minorities in Japan has shifted drastically since the 1990s yet many studies of Japan still tend to view Japan through the dominant discourses of ethnic homogeneity *tanitsu minzoku shakai* and middle class society *so churyu shakai* which positions the exclusion of minorities as an exceptional phenomenon While exclusionism has been recognized as a serious threat to minority groups it has not often been considered a representative issue for the whole of Japanese society This tendency will persist until the discourses of *tanitsu minzoku shakai* and *so churyu shakai* are systematically debunked and Japan is widely

recognized as both multiethnic and socio economically stratified Today as with most advanced capitalist countries serious social divides occasioned by the impacts of globalization and neoliberalism have destabilized Japanese society This book explores not only how Japanese society is diversified and unequal but also how diversity and inequality have caused people to divide into separate realities from which conflict and violence have emerged It empirically examines the current situation while considering the historical development of exclusionism from the interdisciplinary viewpoints of history policy studies cultural studies sociology and cultural anthropology In addition to analyzing the realities of division and exclusionism the authors propose theoretical alternatives to overcome such cultural and social divides

**The Politicization of Social Divisions in Post-War Poland** Piotr Borowiec,2023-02-16 The monograph examines the sources of Polish social divisions It explains their emergence and discusses the mechanisms behind their evolution from 1945 to 2022 The findings corroborate the idea that divisions were formed irrespective of the current state of social hierarchy or the accepted interpretation of justice and that they existed both in totalitarian and democratic systems alike The book distinguishes the category of divisions from the practices of repartition and demonstrates that the repartitions discussed in a political discourse do not generate divisions but constitute the politicization of the latter Repartitions are understood as discursive dichotomic juxtapositions that result from the existence of divisions and can be used as political tools It has been demonstrated that they can also function as analytical categories used with a view to determining the state of social inequalities The notions of divisions and repartitions discussed in this volume confirm the existence of the continuity of changes and describe the evolution of Polish society has a consequence
