Social Reconstructions of the World Automobile Industry Frederic C. Deyo, 2016-07-27 This book assesses the varying ways in which automobile assemblers in several countries of East and Southeast Asia Europe and the Americas have sought to enhance their efficiency and flexibility in response to heightened global competition during the 1980s and early 1990s It then explores the implications of such managerial strategies for workers and trade unions and the responses of unions in seeking to preserve or enhance worker welfare and voice under industrial restructuring **The Global**

Automotive Industry Paul Nieuwenhuis, Peter Wells, 2015-08-06 The automotive industry is still one of the world's largest manufacturing sectors but it suffers from being very technology focused as well as being relatively short term focused There is little emphasis within the industry and its consultancy and analyst supply network on the broader social and economic impacts of automobility and of the sector that provides it The Global Automotive Industry addresses this need and is a first port of call for any academic official or consultant wanting an overview of the state of the industry An international team of specialist researchers both from academia and business review and analyse the key issues that make vehicle manufacturing still the world's premier manufacturing sector closely tied in with the fortunes of both established and newly emerging economies In doing so it covers issues related to manufacturing both established practices as well as new developments issues relating to distribution marketing and retail vehicle technologies and regulatory trends and crucially labour practices and the people who build cars In all this it explains both how the current situation arose and also likely future trajectories both in terms of social and regulatory trends as the technological marketing and labour practice responses to those leading in many cases to the development of new business models Key features Provides a global overview of the automotive industry covering its current state and considering future challenges Contains contributions from international specialists in the automotive sector Presents current research and sets this in an historical and broader industry context Covers threats to the industry including globalization economic and environmental sustainability The Global Automotive Industry is a must have reference for researchers and practitioners in the automotive industry and is an excellent source of information for business schools governments and graduate and undergraduate students in automotive engineering *After Lean Production* Thomas A. Kochan, Russell D. Lansbury, John Paul MacDuffie, 2018-09-05 Nearly every country that produces cars views the automobile industry as strategically important because of its direct economic significance and because it serves as a bellwether for innovation in employment conditions In this book industrial relations experts from eleven countries consider the state of the industry worldwide They are particularly interested in assessing whether the loudly heralded model of lean production initiated by Toyota has become pervasive The contributors focus on employment practices the way work is organized how workers and managers interact the way worker representatives respond to lean production strategies and the nature of the adaptation and innovation process itself **The Global Korean Motor Industry** Russell D.

Capital beyond Borders Kenneth P. Thomas, 2016-07-27 This book challenges the established wisdom regarding the balance of bargaining power between multinational corporations and host governments Most theories beginning with Raymond Vernon's claim that the bargaining power of host states should increase over time This work shows the opposite is true at least for the automobile industry in the industrialized world The reason for this is the growing mobility of production which undercuts host states bargaining positions Capital mobility is thus central to both firm state relations and IPE generally
