

The Social Creation of Nature

NEIL EVERNDEN

Social Creation Of Nature

James E. Sherow

Social Creation Of Nature:

The Social Creation of Nature Lorne Leslie Neil Evernden, 1992-10 In exploring the consequences of conventional understandings of nature *The Social Creation of Nature* seeks a way around the limitations of a socially created nature in order to defend what is actually imperiled wildness in which Thoreau wrote lies hope for the preservation of the world

The Presidio Lisa Benton-Short, 1998 The story of the Presidio's conversion from military post to national park *The Nature of Cities* Michael Bennett, David Warfield Teague, 1999-10 Cities are often thought to be separate from nature but recent trends in ecocriticism demand that we consider them as part of the total environment This new collection of essays sharpens the focus on the nature of cities by exploring the facets of an urban ecocriticism by reminding city dwellers of their place in ecosystems and by emphasizing the importance of this connection in understanding urban life and culture The editors both raised in small towns but now living in major urban areas are especially concerned with the sociopolitical construction of all environments both natural and manmade Following an opening interview with Andrew Ross exploring the general parameters of urban ecocriticism they present essays that explore urban nature writing city parks urban wilderness ecofeminism and the city and urban space The volume includes contributions on topics as wide ranging as the urban poetry of English writers from Donne to Gay the manufactured wildness of a gambling casino and the marketing of cosmetics to urban women by idealizing Third World naturalness These essays seek to reconceive nature and its cultural representations in ways that contribute to understanding the contemporary cityscape They explore the theoretical issues that arise when one attempts to adopt and adapt an environmental perspective for analyzing urban life *The Nature of Cities* offers the ecological component often missing from cultural analyses of the city and the urban perspective often lacking in environmental approaches to contemporary culture By bridging the historical gap between environmentalism cultural studies and urban experience the book makes a statement of lasting importance to the development of the ecocritical movement

CONTENTS

Part 1 *The Nature of Cities* 1 *Urban Ecocriticism An Introduction* Michael Bennett David Teague 2 *The Social Claim on Urban Ecology* Andrew Ross interviewed by Michael Bennett Part 2 *Urban Nature Writing* 3 *London Here and Now Walking Streets and Urban Environments in English Poetry from Donne to Gay* Gary Roberts 4 *All Things Natural Are Strange* Audre Lorde 5 *Urban Nature and Cultural Place* Kathleen R Wallace 6 *Inculcating Wilderness Ecocomposition Nature Writing and the Regreening of the American Suburb* Terrell Dixon Part 3 *City Parks* 7 *Writers and Dilettantes Central Park and the Literary Origins of Antebellum Urban Nature* Adam W Sweeting 8 *Postindustrial Park or Bourgeois Playground Preservation and Urban Restructuring at Seattle's Gas Works Park* Richard Heyman Part 4 *Urban Wilderness* 9 *Boyz in the Woods Urban Wilderness in American Cinema* Andrew Light 10 *Central High and the Suburban Landscape The Ecology of White Flight* David Teague 11 *Manufacturing the Ghetto Anti urbanism and the Spatialization of Race* Michael Bennett Part 5 *Ecofeminism and the City* 12 *An Ecofeminist Perspective on the Urban Environment* Catherine Villanueva Gardner 13 *You*

Make Me Feel Like a Natural Woman The Political Economy of Contemporary Cosmetics Discourse Laura L Sullivan Part 6
 Theorizing Urban Space 13 Darwin s City or Life Underground Evolution Progress and the Shapes of Things to Come Joanne
 Gottlieb 14 Nature in the Apartment Humans Pets and the Value of Incommensurability David R Shumway 15 Cosmology in
 the Casino Simulacra of Nature in the Interiorized Wilderness Michael P Branch **Re-Imagining Nature** Alister E.
 McGrath,2016-08-01 Reimagining Nature is a new introduction to the fast developing area of natural theology written by one
 of the world s leading theologians The text engages in serious theological dialogue whilst looking at how past developments
 might illuminate and inform theory and practice in the present This text sets out to explore what a properly Christian
 approach to natural theology might look like and how this relates to alternative interpretations of our experience of the
 natural world Alister McGrath is ideally placed to write the book as one of the world s best known theologians and a chief
 proponent of natural theology This new work offers an account of the development of natural theology throughout history
 and informs of its likely contribution in the present This feeds in current debates about the relationship between science and
 religion and religion and the humanities Engages in serious theological dialogue primarily with Augustine Aquinas Barth and
 Brunner and includes the work of natural scientists philosophers of science and poets **Reader's Guide to the History of
 Science** Arne Hessenbruch,2013-12-16 The Reader s Guide to the History of Science looks at the literature of science in
 some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and
 central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and
 technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn *The
 Truth of Ecology* Dana Phillips,2003 A wide ranging appraisal of environmental thought It explores such topics as the history
 of ecology radical science studies and ecology the need for greater theoretical sophistication in ecocriticism the dubious
 legacy of Thoreau and the contradictions of contemporary nature writing *A Sense of the American West* James E.
 Sherow,1998-10 An anthology of diverse approaches and issues in the environmental history of the American West
 Learning from Mickey, Donald and Walt A. Bowdoin Van Riper,2014-01-10 Throughout its long and colorful history
 Walt Disney Studios has produced scores of films designed to educate moviegoers as well as entertain them These
 productions range from the True Life Adventures nature documentaries and such depictions of cutting edge technology as
 Man in Space and Our Friend the Atom to wartime propaganda shorts Education for Death public health films VD Attack Plan
 and coverage of exotic cultures The Ama Girls Blue Men of Morocco Even Disney s dramatic recreations of historical events
 Ten Who Dared Invincible have had their share of educational value Each of the essays in this volume focuses on a different
 type of Disney edutainment film Together they provide the first comprehensive look at Walt Disney s ongoing mission to
 inform and enlighten his worldwide audience **The Human Nature of Social Discontent** Gary Thom,1984 To find more
 information about Rowman and Littlefield titles please visit [www rowmanlittlefield com](http://www.rowmanlittlefield.com) *Infinite Nature* R. Bruce

Hull,2006-05 Review In this work R Bruce Hull argues that environmentalism will never achieve its goals unless it sheds its fundamentalist logic The movement is too bound up in polarizing ideologies that pit humans against nature conservation against development and government regulation against economic growth Only when we acknowledge the infinite perspectives on how people should relate to nature will we forge solutions that are respectful to both humanity and the environment Infinite Nature opens doors so that nature can be seen from the scientific understandings proffered by anthropology evolution and ecology to the promise of environmental responsibility offered by technology and economics to the designs of nature envisioned in philosophy art law and religion Along the way Hull helps us find the common ground created out of many natures the place where sustainable and thriving communities are possible **BOOK JACKET**

Ethical Responses to Nature's Call James Magrini,2019-06-05 Arguing for a renewed view of objects and nature Ethical Responses to Nature s Call considers how it is possible to understand our ethical duties in the form of ethical intuitionism to nature and the planet by listening to and releasing ourselves over to the call or address of nature Blending several strands of philosophical thought such as Graham Harman s Object Oriented Ontology W D Ross s prima fathics Alphonso Lingis s phenomenological ethics traceable to The Imperative and Michael Bonnett s ecophilosophy this book offers a unique rejoinder to the problems and issues that continue to haunt humans relationship to nature The origins of such problems and issues largely remain obscured from view due to the oppressive influence of the Cultural Framework which gives form and structure to the ways we understand discourse on and comport ourselves in relation to the natural world Through understanding this Cultural Framework we also come to know the responses we continue to offer in answer to nature s call and address and are then in a position to analyze and assess those responses in terms of their potential ethical weight Such a phenomenon is made possible through the descriptive and interpretive method of eco phenomenology This renewed vision of the human and nature provides direction for our interaction with and behavior toward nature in such a way that the ethical insight offers a diagnosis and provides a potentially compelling prescriptive for environmental ills **Environmental Law**

and Contrasting Ideas of Nature Keith H. Hirokawa,2014-07-17 Law s ideas of nature appear in different doctrinal and institutional settings historical periods and political dialogues Nature underlies every behavior contract or form of wealth and in this broad sense influences every instance of market transaction or governmental intervention Recognizing that law has embedded discrete constructions of nature helps in understanding how humans value their relationship with nature This book offers a scholarly examination of the manner in which nature is constructed through law both in the hard sense of directly regulating human activities that impact nature and in the soft manner in which law s ideas of nature influence and are influenced by behaviors values and priorities Traditional accounts of the intersection between law and nature generally focus on environmental laws that protect wilderness This book will build on the constructivist observation that when considered as a culturally contingent concept nature is a self perpetuating and self reinforcing social creation

Environment and Social Theory John Barry, 2007-01-24 This thematic rather than theorist centred approach is an essential guide to the way in which the environment and social theory relate to one another including examinations of the works of the key theorists including Marx Mill Habermas and Adorno *Nature Writing* Don Scheese, 2002 First published in 2003 Routledge is an imprint of Taylor Francis an informa company

Nature: Reconfiguring the social David Inglis, John Bone, Rhoda Wilkie, 2005 Many influential stances within the social sciences regard nature in one of two ways either as none of their concern which is with the social and cultural aspects of human existence or as wholly a social and cultural fabrication But there is also another strand of social scientific thinking that seeks to understand the interplay between social and cultural factors on one side and natural factors on the other These volumes contain the main contributions that have been made within each of these streams of thought The selections illustrate to the reader the complexity of the various positions within these streams and the strengths and limitations of each perspective A new introduction places these articles in their historical and intellectual context and the volumes are completed with an extensive index and chronological table of contents

Geographies of Nature Steve Hinchliffe, 2007-10-02 An exemplary introduction to cutting edge work on the geographies of nature Intellectually demanding clearly written and empirically rich this is a book that deserves a wide readership within and beyond the geographical discipline Sarah J Whatmore Oxford University Centre for the Environment Geographies of Nature introduces readers to conventional understandings of nature realist environmental constructivist while examining alternative accounts from different disciplines where nature resists easy classification Accessibly written it demonstrates how recent thinking has urgent relevance and impact on the ways in which we approach environmental problems The text Makes concepts like environment conservation and sustainability accessible and applicable with the extensive use of case studies Uses text boxes to introduce readers to debates and ideas Grounds the reader and proceeds to the explanation of more complex arguments progressively Geographies of Nature presents a new kind of environmental analysis one that refuses to view nature as wholly separate to the human and nonhuman practices through which it is constantly made and remade

The Ecological Crisis and the Logic of Capital Xueming Chen, 2017-09-11 The worsening environmental crisis has become a serious threat to mankind The search for a solution to this crisis must begin by understanding its causes Taking an eco socialist perspective The Ecological Crisis and the Logic of Capital explores the logic of capitalism as a fundamental cause of today s environmental crisis in particular the thirst for profit and the capitalist mode of production By demonstrating the inherent antagonism between capital and ecology this book argues that proposals to resolve the crisis within the capitalist system are utopian that proposed remedies relying on scientific progress alternative energies low carbon technologies or the introduction of ecological ethics and new attitudes toward Nature into market mechanisms are doomed to failure without a radical overhaul of the principles that govern capitalism

Critical Perspectives on Social Constructions of Nature Sara Bonati, Margherita Cisani, Marco

Tononi, Giacomo Zanolin, 2025-05-13 This book explores the commodification of nature with a particular emphasis on how this process is perpetrated by capitalist societies Through the example of Italy the book presents another lens to observe landscapes and natures and the different actors both human and non human involved in their production It draws on critical geography perspectives to unveil the socionatural dynamics that form the basis of the commodification of Italian natures It examines how the social construction of nature in Italy produces peculiar effects on ecologies and landscapes as well as on human and non human bodies and how alternative socionatures emerge The book is written primarily for scholars particularly in human cultural and critical geography political ecology cultural studies as well as heritage tourism sustainability and urban studies It will also be of interest to policymakers and planners in nature conservation landscape planning and heritage management

A Social History of Truth Steven Shapin, 1994-06-15 In *A Social History of Truth* a leading scholar addresses these universal questions through an elegant recreation of a crucial period in the history of early modern science the social world of gentlemen philosophers in seventeenth century England Steven Shapin paints a vivid picture of the relations between gentlemanly culture and scientific practice He argues that problems of credibility in science were solved through the codes and conventions of genteel conduct trust civility honor and integrity

General Technical Report NE, 1980

As recognized, adventure as with ease as experience nearly lesson, amusement, as well as concurrence can be gotten by just checking out a ebook **Social Creation Of Nature** next it is not directly done, you could undertake even more just about this life, something like the world.

We provide you this proper as without difficulty as simple pretentiousness to get those all. We manage to pay for Social Creation Of Nature and numerous books collections from fictions to scientific research in any way. accompanied by them is this Social Creation Of Nature that can be your partner.
