Annual Meeting, Jon C. Henderson, 2000 Papers from a session held at the European Association of Archaeologists Fourth Annual Meeting in Göteborg 1998 The contents of this volume are largely made up from papers delivered at The Prehistory and Early History of Atlantic Europe session held on the 25th of September 1998 at the 4th Annual Meeting of the European Association of Archaeologists in Göteborg Sweden The aim of this volume in common with the original aim of the session is quite simply to promote wider discussion on the existence scale and significance of maritime communications between Atlantic communities *European Societies in the Bronze Age* A. F. Harding, 2000-05-18 The Bronze Age roughly 2500 to 750 BC was the last fully prehistoric period in Europe and a crucial element in the formation of the Europe that emerged into history in the later first millennium BC This book focuses on the material culture remains of the period and through them provides an interpretation of the main trends in human development that occurred during this timespan It pays particular attention to the discoveries and theoretical advances of the last twenty years that have necessitated a major revision of received opinions about many aspects of the Bronze Age Arranged thematically it reviews the evidence for a range of topics in cross cultural fashion defining which major characteristics of the period were universal and which culture and area specific The result is a comprehensive study that will be of value to specialists and students while remaining accessible to the non specialist *California Prehistory* Terry L. The Wessex Hillforts Project Andrew Payne, Mark Corney, Barry Cunliffe, 2014-06-15 The earthwork forts that crown many hills in Southern England are among the largest and most dramatic of the prehistoric features that still survive in our modern rural landscape The Wessex Hillforts Survey collected wide ranging data on hillfort interiors in a three year partnership between the former Ancient Monuments Laboratory of English Heritage and Oxford University These defended enclosures occupied from the end of the Bronze Age to the last few centuries before the Roman conquest have long attracted archaeological interest and their function remains central to study of the Iron Age The communal effort and high degree of social organisation indicated by hillforts feeds debate about whether they were strongholds of Celtic chiefs communal centres of population or temporary gathering places occupied seasonally or in times of unrest Yet few have been extensively examined archaeologically Using non invasive methods the survey enabled more elaborate distinctions to be made between different classes of hillforts than has hitherto been possible The new data reveals not only the complexity of the archaeological record preserved inside hillforts but also great variation in complexity among sites Survey of the surrounding countryside revealed hillforts to be far from isolated features in the later prehistoric landscape Many have other less visible forms of enclosed settlement in close proximity Others occupy significant meeting points of earlier linear ditch systems and some appear to overlie or be located adjacent to blocks of earlier prehistoric field systems
