Sports Injuries Freddie H. Fu, David Alan Stone, 1994 **Snow Engineering** V P. Bartelt, E. Adams, M. Christen, R. Sack, A. Sato, 2004-06-15 Specialists in building and civil engineering architecture traffic and transport engineering urban planning and avalanche science came together at the Fifth International Conference on Snow Engineering organized by the Federal Swiss Institute for Snow and Avalanche Research in Davos 2004 This event belongs to a series of Snow Engineering Conferences held every four years since 1988 These conferences have become an important event for the international exchange of information on recent developments in snow engineering The following thematic areas were discussed in the technical sessions and are here presented in this volume Transportation Housing and Residential Planning Snow Loads Ski Mechanics Hazard Mitigation Snow Technology and Science Avalanche Engineering Youth and Winter Sports Gregoire P. Millet, Fabien Ohl, 2021-07-28 **The Physics of Skiing** David A. Lind, Scott P. Sanders, 2013-06-29 Just over ten years ago when the first drafts of this book were being written and even more so a few years after that as it was making its way through the publication process alpine skiing was experiencing what eventually became a complete revolution in equipment and technique shaped or parabolic skis completely took over the market and even relatively beginning skiers expected to carve graceful turns as they schussed down the slopes Re reading our work with an eye to revision we have been surprised to see how our focus on the physics of skiing in the first edition allowed us to recognize the fundamental importance of what were then quite novel changes in equipment and technique The essence of the enhancement offered by shaped skis is their greater sidecut radius Our original discussion then and now in Chapters 3 and 4 of the crucial role that a ski's sidecut plays in carving a turn caused us to write for the most part as if the shaped ski had always been in existence Similarly our interest in the geometry of the sidecut allowed us to discuss snowboards in some detail as well for the key to their ability to shred down the mountain is their deep sidecut **The Encyclopaedia of Sports Medicine: Clinical practice of sports injury prevention and care** A.
