The Oxford Handbook of African American Language Sonja Lanehart,2015-05-04 The goal of The

Oxford Handbook of African American Language is to provide readers with a wide range of analyses of both traditional and contemporary work on language use in African American communities in a broad collective. The Handbook offers a survey of language and its uses in African American communities from a wide range of contexts organized into seven sections: Origins and Historical Perspectives; Lects and Variation; Structure and Description; Child Language; Acquisition and Development; Education; Language in Society; and Language and Identity. It is a handbook of research on African American Language (AAL) and as such provides a variety of scholarly perspectives that may not align with each other as is indicative of most scholarly research. The chapters in this book interact with one another as contributors frequently refer the reader to further elaboration on and references to related issues and connect their own research to related topics in other chapters within their own sections and the handbook more generally to create dialogue about AAL, thus affirming the need for collaborative thinking about the issues in AAL research. Though the Handbook does not and cannot include every area of research, it is meant to provide suggestions for future work on lesser studied areas, e.g., variation, heterogeneity in regional social and ethnic communities, by highlighting a need for collaborative perspectives and innovative thinking while reasserting the need for better research and communication in areas thought to be resolved.

Early Modern Virginia Douglas Bradburn, John C. Coombs, 2011-09-20. This collection of essays on seventeenth century Virginia, the first such collection on the Chesapeake in nearly twenty five years, highlights emerging directions in scholarship and helps set a new agenda for research in the next decade and beyond. The contributors represent some of the best of a younger generation of scholars who are building on but also criticizing and moving beyond the work of the so-called Chesapeake School of social history that dominated the historiography of the region in the 1970s and 1980s. Employing a variety of methodologies, analytical strategies, and types of evidence, these essays explore a wide range of topics and offer a fresh look at the early religious, political, economic, social, and intellectual life of the colony. The Making of African America Ira Berlin, 2010-01-21 A leading historian offers a sweeping new account of the African American experience over four centuries Four great migrations defined the history of black people in America the violent removal of Africans to the east coast of North America known as the Middle Passage the relocation of one million slaves to the interior of the antebellum South the movement of more than six million blacks to the industrial cities of the north and west a century later and since the late 1960s the arrival of black immigrants from Africa the Caribbean South America and Europe These epic migrations have made and remade African American life Ira Berlin's magisterial new account of these passages evokes both the terrible price and the moving triumphs of a people forcibly and then willingly migrating to America In effect Berlin rewrites the master narrative of African America challenging the traditional presentation of a linear path of progress He finds instead a dynamic of change in which eras of deep rootedness alternate with eras of massive movement tradition giving way to innovation The culture of black America is constantly evolving affected by and affecting places as far away from one another as Biloxi Chicago Kingston and Lagos Certain to garner widespread media attention *The Making of African America* is a bold new account of a long and crucial chapter of American history
