As You sow so Shall You Reap Michal Andrie, Mr. Antonio David, Mr. Raphael A. Espinoza, Marshall Mills, Luis-Felipe Zanna, 2012-05-01 This paper presents an analysis of the public investment scaling up strategy for Togo using a dynamic macroeconomic model that explicitly analyzes the links between public investment economic growth and debt sustainability In the model public capital is productive and complementary to private capital generating positive medium and long run effects to increases in public investment The model application indicates that a very large increase in public investment would have positive macroeconomic effects in the long run but would require unrealistic increases in the tax burden to cover recurrent costs and ensure debt sustainability More modest increases in public investment would require more feasible increases in the tax burden particularly if the efficiency of tax collection is improved The model simulations also emphasize the importance of improvements in the efficiency of public investment to reap welfare gains However even if the macroeconomic implications of public investment scaling up can be favorable in the long run under certain assumptions on rates of return and efficiency of investment the transition period is challenging and exposes the country to increased risk of unsustainable debt dynamics The model was also used to assess the growth projections underlying the standard Excel based debt sustainability analysis for Togo So Shall You Reap Marilyn Wallace, 1993 **The Railroad Telegrapher** , 1916
