American Apartheid Douglas S. Massey, Nancy A. Denton, 1993 This powerful and disturbing book clearly links persistent poverty among blacks in the United States to the unparalleled degree of deliberate segregation they experience in American cities American Apartheid shows how the black ghetto was created by whites during the first half of the twentieth century in order to isolate growing urban black populations It goes on to show that despite the Fair Housing Act of 1968 segregation is perpetuated today through an interlocking set of individual actions institutional practices and governmental policies In some urban areas the degree of black segregation is so intense and occurs in so many dimensions simultaneously that it amounts to hypersegregation The authors demonstrate that this systematic segregation of African Americans leads inexorably to the creation of underclass communities during periods of economic downturn Under conditions of extreme segregation any increase in the overall rate of black poverty yields a marked increase in the geographic concentration of indigence and the deterioration of social and economic conditions in black communities As ghetto residents adapt to this increasingly harsh environment under a climate of racial isolation they evolve attitudes behaviors and practices that further marginalize their neighborhoods and undermine their chances of success in mainstream American society This book is a sober challenge to those who argue that race is of declining significance in the United States today

Multi-risk Interactions Towards Resilient and Sustainable Cities Tiago Miguel Ferreira, 2023-04-24 For years researchers have studied the risks of individual natural hazards in urban areas However the impact of multiple hazards has not yet received widespread attention in research and urban management practice which is a significant gap in the current climate change context This book aims to contribute to filling that gap by examining the process of identifying assessing and managing multi hazard risks in urban areas From identifying and assessing the vulnerability of the elements exposed to the impact of natural hazards including earthquakes floods fires and landslides this book covers all the critical stages of multi hazard risk assessment and management in a climate change context The concepts and approaches discussed in the book are applied to the Lisbon Metropolitan Area a dynamic and thriving metropolis allowing readers to see those theories applied in a real setting In addition to providing a solid theoretical foundation this book offers practical guidelines for conducting risk assessment at the metropolitan scale which makes it a valuable resource for researchers practitioners and decision makers interested in understanding and managing multi hazard risks in urban areas
