Social Benefits Of Education:

The Social Benefits of Education Jere R. Behrman, Nevzer Stacey, 2010-08-04 For decades the primary argument in justifying education has been based on its direct economic effects Yet education also provides social benefits for individuals and society at large including a better way of taking care of ourselves and consequently creating a better society to live in Though it is difficult to quantify these social benefits a more systematic analysis would improve our understanding of the full effects of education and provide a basis for considering related policies The Office of Research of the United States Department of Education commissioned a series of papers on measuring these effects of education Those papers revised and updated are collected here Kenneth J Arrow provides perspective on education and preference formation and Jere R Behrman considers general conceptual and measurement issues in assessing the social benefits of education and policies related to education These issues are taken up by experts in four fields health parenting the environment and crime Themes addressed include measurement issues regarding what we mean by education and its benefits basic analytical issues in assessing the impact of education on these social benefits using behavioral data and whether the social benefits of education justify public policy interventions Jere R Behrman is William R Kenan Jr Professor of Economics University of Pennsylvania Nevzer G Stacey is Senior Research Analyst Office of Educational Research U S Department of Education [What Are the Social Benefits of Education?](#) ,2013 **The Social Benefits of Education** Aimee Concepcion Chavez (author),1901 **What Are the Social Benefits of Education?** Organisation for Economic Co-operation and Development,2013 On average across 15 OECD countries a 30 year old male tertiary graduate can expect to live another 51 years while a 30 year old man who has not completed upper secondary education can expect to live an additional 43 years A similar comparison between women in the two educational groups reveals less of a difference than that among men In 27 OECD countries on average 80% of young tertiary graduates say they vote while only 54% of young adults who have not completed upper secondary education do so The difference in voting rates by level of education is much smaller among older age groups Education can bring significant benefits to society not only through higher employment opportunities and income but also via enhanced skills improved social status and access to networks By fully recognising the power of education policy makers could better address diverse societal challenges *The Macro-social Benefits of Education, Training and Skills in Comparative Perspective* John Preston, Andy Green, 2003 **Critical Perspectives on Economics of Education** Silvia Mendolia, Martin O'Brien, Alfredo R.
