The Organisation of Knowledge in Victorian Britain Martin Daunt,2005-05-26 This collection of essays explores the questions of what counted as knowledge in Victorian Britain who defined knowledge and the knowledgeable by what means and by what criteria During the Victorian period the structure of knowledge took on a new and recognizably modern form and the disciplines we now take for granted took shape The ways in which knowledge was tested also took on a new form with the rise of written examinations New institutions of knowledge were created museums were important at the start of the period universities had become prominent by the end Victorians needed to make sense of the sheer scale of new information to popularize it and at the same time to exclude ignorance and error a role carried out by encyclopaedias and popular publications By studying the Victorian organization of knowledge in its institutional social and intellectual settings these

essays contribute to our wider consideration of the complex and much debated concept of knowledge Science of Goal Formulation Stuart A. Umpleby, 1990-12-01 This work contains the proceedings of a meeting held by 18 American and Soviet scholars on the state of cybernetics and systems theory in their two countries American interest focused on the observation of systems whilst Soviet interest focused on mathematical modelling **Alternative Pathways in Science and Industry** David J. Hess, 2007-03-16 In *Alternative Pathways in Science and Industry* David Hess examines how social movements and other forms of activism affect innovation in science technology and industry Synthesizing and extending work in social studies of science and technology social movements and globalization Hess explores the interaction of grassroots environmental action and mainstream industry and offers a conceptual framework for understanding it Hess proposes a theory of scientific and technological change that considers the roles that both industry and grassroots consumers play in setting the research agenda in science and technology and he identifies alternative pathways by which social movements can influence scientific and technological innovation He analyzes four of these pathways industrial opposition movements organized against targeted technologies as in the campaign against nuclear energy technology and product oriented movements which press for alternatives as does the organic food movement localism which promotes local ownership as in buy local campaigns and access pathways which support a more equitable distribution of resources Within each pathway Hess examines reforms in five different areas agriculture energy waste and manufacturing infrastructure and finance The book s theoretical argument and empirical evidence demonstrate the complex pattern of incorporation of grassroots innovations and transformation of alternative ownership structures and the alternative products themselves that has characterized the relationship of industry and activism Hess s analysis of alternative pathways to change suggests ways economic organizations could shift to a more just and sustainable course in the twenty first century **1973 National Science Foundation Authorization** United States. Congress. House. Committee on Science and Astronautics. Subcommittee on Science, Research, and Development, 1972 Sustainability Science Per Becker, 2023-11-07 Sustainability is increasingly important across functional sectors and scientific disciplines Policy makers practitioners and academics continue to wrestle with the complexity of risk resilience and sustainability but because of the necessary transdisciplinary focus it is difficult to find authoritative content in a single source *Sustainability Science Managing Risk and Resilience for Sustainable Development Second Edition* contributes to filling that gap and is completely revised with several new chapters It asserts that all efforts for the sustainability of humankind are undermined by the four fundamental challenges of complexity uncertainty ambiguity and dynamic change While there are no silver bullets this book contends that we need systems approaches risk approaches participatory approaches and resilience approaches to address each of them and endeavours to provide such With that in mind this book describes the state of the world Part I proposes a way to approach the world Part II and suggests how to set out to change the world Part III Introduces a new agenda for sustainable

development that reflects current thinking in sustainability science Draws lessons from the entire history of humankind to help us understand our present and inform decisions for our future Operationalises key concepts to provide a clear link between theory to practice Combines a stern message about staggering sustainability challenges with advice for practical action and calls for hope Includes new chapters on complexity what it is how it manifests and its consequences on resistance to knowledge and change focusing on the drivers behind the phenomena and how to overcome them and more Empire and the Sun Alex Soojung-Kim Pang,2002 Astronomy was a popular and important part of Victorian sciences and British astronomers carried telescopes to remote areas in India North America and Caribbean and Pacific islands to watch solar eclipses This book tells the full story of these expeditions the long periods of planning and financing and the day to day work of getting to field sites setting up camp and preparing observing and recording eclipses Federal Policy, Plans, and Organization for Science and Technology United States.
