Kickboxing Exercises Conclusion References Author Bio Publisher Preface Performing warm ups before any high intensity
physical activity sports or exercises is important in a multitude of ways A good fulfilling session of warm up exercises will
make sure that the body does not go into the energy demanding phase of an exercise or workout too swiftly There will be a
gradual increase in your heart rate which will steadily increase the flow of blood in your muscles and other parts of the body
preparing you both physically and mentally for an injury free exercise The importance of a workout can be compared simply
to the analogy of a car being driven in cold weather what people tend to do is allow their cars to warm up before picking up
high speeds The same principle in a slightly modified sense applies to a workout For a strenuous and demanding workout its
best to physically prepare yourself by steadily increasing the body s temperature with patience By giving your body a nice
warm up with many of the techniques like jogging walking etc you are in fact improving blood circulation within different
joints muscles and tendons much like oiling a squeaky wheel With the increased blood flow the heart rate also rises and the
muscles warm up to prevent any injury from taking place Moreover warm up exercises also have a psychological affect and
they prepare your brain by easing it into the physical activities that are soon to follow This is extremely helpful in exercises
like weight lifting high intensity running and aerobics The body and mind thus synchronize and ease into the workout making
sure that no part of the body faces any injury as a result of the exercises that are soon to follow Keep reading on and find out
the details of a warm up
