 books for boys girls and reluctant ESL readers *Everything in Everything* Anna Marmodoro, 2017 Anaxagoras of
 Clazomenae 5th century BCE is best known in the history of philosophy for his stance that there is a share of everything in
 everything He puts forward this theory of extreme mixture as a solution to the problem of change he and his contemporaries
 inherited from Parmenides that what is cannot come from what is not and vice versa Yet for ancient and modern scholars
 alike the metaphysical significance of Anaxagoras's position has proven challenging to understanding In *Everything in
 Everything* Anna Marmodoro offers a fresh interpretation of Anaxagoras's theory of mixture arguing for its soundness and
 also relevance to contemporary debates in metaphysics For Anaxagoras the fundamental elements of reality are the opposites
 hot cold wet dry etc which Marmodoro argues are instances of physical causal powers The unchanging opposites compose
 mereologically forming phenomenologically emergent wholes Everything in the universe except nous derives from the
 opposites The opposites exist as endlessly partitioned they can be scattered everywhere and be in everything Marmodoro
 further shows that their extreme mixture is made possible by the omni presence and hence com presence in the universe
 which is in turn facilitated by the limitless divisibility of the opposites Anaxagoras tackles the logical consequences of the
 limitless divisibility of the elements He is the first ante litteram gunk lover in the history of metaphysics He also has a unique
 conception of non material gunk and a unique power ontology which Marmodoro refers to as power gunk Marmodoro
 investigates the nature of power gunk and the explanatory utility of the concept for Anaxagoras for his theory of extreme
 mixture Whilst most defenders of an atomless universe nowadays argue for material gunk as a conceptual possibility only
 Anaxagoras argues for power gunk as the ontology of nature **Billion Dollar Revenge: A Fake Dating Opposites
