The Spread of Nuclear Weapons Scott Douglas Sagan, 2003
The Politics of Nuclear Weapons in South Asia Bhumitra Chakma, 2016-02-24 An important and critical re-evaluation of South Asia's post-test nuclear politics. In contrast to other books, this volume emphasises the political dimension of South Asia's nuclear weapons, explaining how the bombs are used as politico-strategic assets rather than pure battlefield weapons, and how India and Pakistan utilise them for politico-strategic purposes in an extremely complex and competitive South Asian strategic landscape. Written by a group of perceptive observers of South Asia, this volume evaluates the current state of Indo-Pakistani nuclear deterrence, the challenges that the two countries confront in building their nuclear forces, the post-test nuclear doctrines of the two strategic rivals, the implications of Indo-Pakistani politics for regional cooperation, the role of two systemic actors, USA and China, in the region's nuclear politics, and the critical issues of confidence building and nuclear arms control.

Nuclear Asymmetry and Deterrence Jan Ludvik, 2016-11-10 This book offers a broader theory of nuclear deterrence and examines the way nuclear and conventional deterrence interact with non-military factors in a series of historical case studies. The existing body of literature largely leans toward the analytical primacy of nuclear deterrence, and it is often implicitly assumed that nuclear weapons are so important that when they are present, other factors need not be studied. This book addresses this omission. It develops a research framework that incorporates the military aspects of deterrence, both nuclear and conventional, together with various perceptual factors, international circumstances, domestic politics, and norms. This framework is then used to re-examine five historical crises that brought two nuclear countries to the brink of war: the hostile asymmetric nuclear relations between the United States and China in the early 1960s, between the Soviet Union and China in the late 1960s, between Israel and Iraq in 1977, 1981, between the United States and North Korea in 1992, 1994, and finally between the United States and the Soviet Union during the 1962 Cuban missile crisis. The main empirical findings challenge the common expectation that the threat of nuclear retaliation represents the ultimate deterrent. In fact, it can be said with a high degree of confidence that it was rather the threat of conventional retaliation that acted as a

The Age of Hiroshima Michael D. Gordin, G. John Ikenberry, 2020-01-14 A multifaceted portrait of the Hiroshima bombing and its many legacies On August 6 1945 in the waning days of World War II the United States dropped an atomic bomb on the Japanese city of Hiroshima The city's destruction stands as a powerful symbol of nuclear annihilation but it has also shaped how we think about war and peace the past and the present and science and ethics The Age of Hiroshima traces these complex legacies exploring how the meanings of Hiroshima have reverberated across the decades and around the world Michael D Gordin and G John Ikenberry bring together leading scholars from disciplines ranging from international relations and political theory to cultural history and science and technology studies who together provide new perspectives on Hiroshima as both a historical event and a cultural phenomenon As an event Hiroshima emerges in the flow of decisions and hard choices surrounding the bombing and its aftermath As a phenomenon it marked a revolution in science politics and the human imagination the end of one age and the dawn of another The Age of Hiroshima reveals how the bombing of Hiroshima gave rise to new conceptions of our world and its precarious interconnectedness and how we continue to live in its dangerous shadow today
