Improving Self-Regulated Learning with Self-Management Tool: An Empirical Study (Penerbit USM) Melissa Ng Lee Yen Abdullah, 2014 Self regulated learning is recognized as one of the most essential skills that students should possess in this information age. Nevertheless, most students are accustomed to the conventional teacher centered way of learning, thus they are not competent at self regulated learning. A Self Management Tool was developed to guide and enhance students' usage of self regulated learning strategies. The tool comprises three components: Information Management Tool, Personal Management Tool, and a Teacher's Manual. A quasi experimental study was conducted to test its effectiveness, and the details of this empirical research were documented in this monograph. The monograph is divided into six chapters with detailed descriptions on the research methodology. The Self Management Tool was found to be effective in improving students' self regulated learning. The findings have significant research and educational implications. Recommendations for future research are included in the final chapter of the monograph. Universiti Sains Malaysia. Penerbit Universiti Sains Malaysia.

Introduction to Social Research Keith F Punch, 2005-03-15 This book offers an excellent description of quantitative and qualitative design and analysis taught in the context of three inquiry pathways: knowledge development, social inquiry, and social research. Furthermore, it provides an excellent overview of both quantitative and qualitative methods with regard to their different epistemologies, methods, and techniques. Additionally, Punch provides information guiding students in the use of computers for quantitative and qualitative analysis, and a wide range of illustrative examples to give the book a practical flavour.
