Critical Landscape

Planning during the Belt and Road Initiative Ashley Scott Kelly, Xiaoxuan Lu, 2021-09-29 This open access book traces the development of landscapes along the 414 kilometer China Laos Railway one of the first infrastructure projects implemented under China's Belt and Road Initiative BRI and which is due for completion at the end of 2021 Written from the perspective of landscape architecture and intended for planners and related professionals engaged in the development and conservation of these landscapes this book provides history planning pedagogy and interdisciplinary framing for working alongside the often opaque planning design and implementation processes of large scale infrastructure It complicates simplistic notions of development and urbanization frequently reproduced in the Laos China frontier region Many of the projects and sites investigated in this book are recent firsts in Laos Laos's first wildlife sanctuary for trafficked endangered species its first botanical garden and its first planting plan for a community forest Most often the agents and accomplices of neoliberal development the planning and design professions including landscape architecture have little dialogue with either the mainstream natural sciences or critical social sciences that form the discourse of projects in Laos and comparable

contexts Covering diverse conceptions and issues of development including cultural and scientific knowledge exchanges between Laos and China nature tourism connectivity and new town planning this book also features nine planning proposals for Laos generated through this research initiative since the railway s groundbreaking in 2016 Each proposal promotes a wider landscape approach to development and deploys landscape architecture s spatial and ecological acumen to synthesize critical development studies with the planner s capacity if not naive predilection to intervene on the ground Ultimately this book advocates the cautious engagement of the professionally oriented built environment disciplines such as regional planning civil engineering and landscape architecture with the landscapes of development institutions and environmental NGOs
