Forever for All R. Michael Perry,2000 This book considers the problems of death and the hereafter and how these ages old problems ought to be addressed in light of our continuing progress A materialistic viewpoint of reality is assumed denying the likelihood of supernatural or other superhuman assistance Death however is not seen as

inevitable or even irreversible it is maintained that the problem can and should be addressed scientifically in all of its aspects The book thus follows recent immortalist thinking that places hopes in future advances in our understanding and technology A functionalist reductionist argument is developed for the possibility of resurrecting the dead through the eventual creation of replicas and related constructs Meanwhile it is urged medical advances leading to the conquest of biological death should be pursued along with cryonics freezing the newly deceased for possible eventual reanimation A common ground thus is sought between two hitherto largely independent strands of scientific immortalism the one based on hopes in a remote but hyperadvanced future the other on the nearer term prospects of presently advancing technology The resulting philosophy encompassing both past and future is directed toward the long term interests of each sentient being and it thereby acquires a moral dimension The immortalization of humans and other life forms is seen as a great moral project and labor of love that will unite us in a common cause and provide a meaningful destiny A rational and thorough exploration of human potential Few have considered much less visualized the profound changes set to occur over the next few decades through exponential advances in science and philosophy Mike Perry has and he shares his vision with eloquence Jim Halperin author of *The Truth Machine* and *The First Immortal* *Out of the Rabbit Hole: Breaking the Cycle of Addiction* D.A Berberich, Ph.D.,2013-04-16 There is an epidemic in this country that is wiping out our youth Drug addiction and mental illness affect youth from every socioeconomic section of society The dangers of drug use are not limited to overdose Club drug use has greatly increased the incidence of HIV in the heterosexual adolescent population from unprotected sex Similarly suicide is also related to substance abuse and is one of the leading causes of death in adolescent males who suffer from co occurring disorders Evidence based treatment is currently the recommended treatment for individuals with mental health and substance abuse disorders also referred to as co occurring disorders Despite this there are few providers willing to truly work with adolescents who have co occurring disorders and all too often many adolescents fall through the cracks in our health care system This book examines addiction and psychological theories and their application to the treatment of co occurring disorders Basic biological and social factors involved with addiction are also reviewed in a manner to increase understanding of how an integrated system of care should work Information presented herein is intended to increase understanding of co occurring disorders for the general public law enforcement therapists counselors and all health care providers to better their understanding and ability to reach out to help adolescents with mental health and substance abuse disorders Integrated treatment involves coordination between drug counselors therapists and psychiatrists This book serves as the foundation for a treatment program designed for young people from low to middle income families many of whom due to financial limitations have been effectively excluded from receiving valuable treatment for their co occurring disorders Above all else the thoughts contained in this book are written as an outreach to the very individuals who suffer from co occurring disorders to instill hope and renewed resolve to help them move forward in their recovery **Case Studies in Pharmacy Ethics**
