The Copycat Effect Loren Coleman, 2004-09-14 VIOLENCE BEGETS VIOLENCE BEGETS VIOLENCE A disturbed student shoots up his classroom and suddenly a wave of mass murder is sweeping through our nation's schools A young child is taken from her home and for months afterward child abductions are frantically reported on an almost daily basis A surfer is attacked by a shark and the public spends an entire summer fearing an onslaught of the deadly underwater predators Why do the terrible events we see in the media always seem to lead to more of the same Noted author and cultural behaviorist Loren Coleman explores how the media's over saturated coverage of murders suicides and deadly tragedies makes an impact on our society This is The Copycat Effect the phenomenon through which violent events spawn violence of the same type From recognizing the emerging patterns of the Copycat Effect to how we can deal with and counteract its consequences as individuals and as a culture Loren Coleman has uncovered a tragic flaw of the information age a flaw which must be corrected before the next ripples of violence spread

Contagion of Violence National Research Council, Institute of Medicine, Board on Global Health, Forum on Global Violence Prevention, 2013-03-06 The past 25 years have seen a major paradigm shift in the field of violence prevention from the assumption that violence is inevitable to the recognition that violence is preventable Part of this shift has occurred in thinking about why violence occurs and where intervention points might lie In exploring the occurrence of violence researchers have recognized the tendency for violent acts to cluster to spread from place to place and to mutate from one type to another Furthermore violent acts are often preceded or followed by other violent acts In the field of public health such a process has also been seen in the infectious disease model in which an agent or vector initiates a specific biological pathway leading to symptoms of disease and infectivity The agent transmits from individual to individual and levels of the disease in the population above the baseline constitute an epidemic Although violence does not have a readily observable biological agent as an initiator it can follow similar epidemiological pathways On April 30 May 1 2012 the Institute of Medicine IOM Forum on Global Violence Prevention convened a workshop to explore the contagious nature of violence Part of the Forum's mandate is to engage in multisectoral multidirectional dialogue that explores crosscutting evidence based approaches to violence prevention and the Forum has convened four workshops to this point exploring various elements of violence prevention The workshops are designed to examine such approaches from multiple perspectives and at multiple levels of society In particular the workshop on the contagion of violence focused on exploring the epidemiology of the contagion describing possible processes and mechanisms by which violence is transmitted examining how contextual factors mitigate or exacerbate the issue Contagion of Violence Workshop Summary covers the major topics that arose during the 2 day workshop It is organized by important elements of the infectious disease model so as to present the contagion of violence in a larger context and in a more compelling and comprehensive way Morbidity and Mortality Weekly Report ,1991 The Practical Playbook II J.
