Pancho Villa's Revolution by Headlines Mark Cronlund Anderson, 2001-09-01 This colorful history of Pancho Villa as a propagandist tells how the legendary guerrilla waged war not only on the battlefield but also in the mass media where he promoted his foreign policy of friendship with the United States in a bid to gain American backing for the Mexican Revolution between 1913 and 1915 Mark Cronlund Anderson explores issues of race identity and the power of the mass media to explain how Villa dueled with his archrivals Mexican dictator Victoriano Huerta and Villa s ostensible colleague in arms Venustiano Carranza using a sophisticated public relations machine

Sites Unseen William A. Gleason, 2011-08-22 *Sites Unseen* examines the complex intertwining of race and architecture in nineteenth and early twentieth century American culture the

period not only in which American architecture came of age professionally in the U S but also in which ideas about architecture became a prominent part of broader conversations about American culture history politics and although we have not yet understood this clearly race relations This rich and copiously illustrated interdisciplinary study explores the ways that American writing between roughly 1850 and 1930 concerned itself often intensely with the racial implications of architectural space primarily but not exclusively through domestic architecture In addition to identifying an archive of provocative primary materials *Sites Unseen* draws significantly on important recent scholarship in multiple fields ranging from literature history and material culture to architecture cultural geography and urban planning Together the chapters interrogate a variety of expressive American vernacular forms including the dialect tale the novel of empire letters and pulp stories along with the plantation cabin the West Indian cottage the Latin American plaza and the Oriental parlor These are some of the overlooked plots and structures that can and should inform a more comprehensive consideration of the literary and cultural meanings of American architecture Making sense of the relations between architecture race and American writing of the long nineteenth century in their regional national and hemispheric contexts *Sites Unseen* provides a clearer view not only of this catalytic era but also more broadly of what architectural historian Dell Upton has aptly termed the social experience of the built environment
