**Cumulative List of Organizations Described in Section 170 (c) of the Internal Revenue Code of 1954** United States. Internal Revenue Service, 2002 **Cumulative List of Organizations Described in Section 170 (c) of the Internal Revenue Code of 1986**, 1990 **Publication**, 1991 *Library of Congress Subject Headings* Library of Congress, 2010 *Contemporary Asian American Communities* Linda Trinh Võ, Rick Bonus, 2009 Once thought of in terms of geographically bounded spaces Asian America has undergone profound changes as a result of post 1965 immigration as well as the growth and reshaping of established communities This collection of original essays demonstrates that conventional notions of community of ethnic enclaves determined by exclusion and ghettoization now have limited use in explaining the dynamic processes of contemporary community formation Writing from a variety of perspectives these contributors expand the concept of community to include sites not necessarily bounded by space formations around gender class sexuality and

generation reveal new processes as well as the demographic diversity of today's Asian American population. The case studies gathered here speak to the fluidity of these communities and to the need for new analytic approaches to account for the similarities and differences between them. Taken together, these essays forcefully argue that it is time to replace the outworn concept of a monolithic Asian America.

**Chinatown around the World** Bernard P. Wong, Chee-Beng Tan, 2013-03-21

The phenomenon of Chinatown has been of great interest to the general public as well as scholars. Movies and story books have made Chinatown to be exotic, mysterious, gangster-filled, and sometimes a gilded ghetto, an ethno-polis, a cultural diaspora, as well as a model community. The authors of *Chinatown around the World* seek to expose the social reality of Chinatowns with empirical data. The authors also examine the changing nature and functions of Chinatowns around the world while scrutinizing how factors emanating from larger societies and other external factors have shaped Chinatown development and transformation. The activities of the recent Chinese transnational migrants are also critically appraised.

**New People in Old Neighborhoods** Louis Winnick, 1990-10-30

The recent wave of immigration into this country has given rise to myriad concerns from the worries about the impact of immigration on the nation's economy to questions about whether multilingual education should be used in public schools. The resulting debates have overshadowed some very good news: this influx of New Immigrants has resulted in an astonishing rebirth of many of our older, decaying cities. Nowhere has this demographic renewal been more apparent than in New York City, as Louis Winnick demonstrates in *New People in Old Neighborhoods*, a timely and perceptive study of the effects of immigration in Brooklyn's Sunset Park. Sunset Park was born of the late nineteenth-century flood of immigrants who developed a prosperous waterfront commerce by the end of World War I; the community had achieved a thriving maturity. Yet the decades following World War II brought about a period of urban decay, lifted only by the post-1965 influx of more than 20,000 immigrants, most notably from Asia and the Caribbean Basin. These New Immigrants not only revived the dying community but enriched it with greater ethnic diversity than it had ever known. Winnick combines data on ethnic change and living patterns with data on employment, housing, school enrollment, and subway ridership to study the revitalization of Sunset Park. He discusses the ethnic composition and characteristics of the new immigrants, trends in self-employment and entrepreneurship, microcapitalism, immigrant impact upon retailing, manufacturing, and the lower echelons of the service industries, skill and education levels, and presence in the professions. Winnick also discusses the immigrants' positive effect on faltering New York systems such as the subways and public schools, and places immigrant renewal within the larger context of overall housing and economic regeneration in New York City. *New People in Old Neighborhoods* views today's immigrants as the historic heirs to the community builders of the last century and offers important insights into the often troubled yet transforming relationship between the nation and its foreign-born population. The future of these immigrants will be a yardstick to measure the quality and performance of our cities and their neighborhoods in the years ahead.

**Ethics in Design and Communication** Laura Scherling, Andrew DeRosa, 2020-02-20

This timely collection brings together critical analytic historical and practical studies to address what ethics means in the practice of design. Designers face the same challenges as everyone else in the complex conditions of contemporary cultural life: choices about consumption, waste, exploitation, ecological damage, and political problems built into the supply chains on which the global systems of inequity currently balance precariously. But designers face the additional dilemma that their paid work is often entangled with promoting the same systems such critical approaches seek to redress: how to reconcile this contradiction among others in seeking to chart an ethical course of action while still functioning effectively in the world. Ethics in Design and Communication acknowledges the complexity of this subject matter while also demonstrating that in the ongoing struggle towards an equitable and sustainable world the talents of design and critical thought are essential. Featured case studies include graphic design internships, today the dark web, and media coverage of the 2016 US presidential election. The fact that within this book such a wide array of practitioners, scholars, critics, and professionals commit to addressing current injustices is already a positive sign. Nonetheless, it is essential that we guard against confusing the coercive force of moral imperatives with ethical deliberation when conceiving a foundation for action.

Green Gentrification Kenneth Gould, Tammy Lewis, 2016-07-15 Green Gentrification looks at the social consequences of urban greening from an environmental justice and sustainable development perspective. Through a comparative examination of five cases of urban greening in Brooklyn, New York, it demonstrates that such initiatives while positive for the environment tend to increase inequality and thus undermine the social pillar of sustainable development. Although greening is ostensibly intended to improve environmental conditions in neighborhoods, it generates green gentrification that pushes out the working class and people of color and attracts white wealthier migrants. Simply put, urban greening richens and whitens, remaking the city for the sustainability class. Without equity-oriented public policy intervention, urban greening is negatively redistributive in global cities. This book argues that environmental injustice outcomes are not inevitable. Early public policy interventions aimed at neighborhood stabilization can create more just sustainability outcomes. It highlights the negative social consequences of green growth coalition efforts to green the global city and suggests policy choices to address them. The book applies the lessons learned from green gentrification in Brooklyn to urban greening initiatives globally. It offers comparison with other greening global cities. This is a timely and original book for all those studying environmental justice, urban planning, environmental sociology, and sustainable development, as well as urban environmental activists, city planners, and policy makers interested in issues of urban greening and gentrification.
