**The Snake that Swallowed Its Tail** Mark Garnett,2013-11-18 Liberal values are the hallmark of a civilised society Yet they depend on an optimistic view of the human condition Stripped of this essential ingredient liberalism has become a hollowed out abstraction Tracing its effects through the media politics and the public services the author argues that hollowed out liberalism has helped to produce our present discontent Unless we stop boasting about our values and try to recover their essence liberal society will be crushed in the coils of its own contradictions      **Screening in Disease**

**Prevention** Walter W Holland,Susie Stewart,2018-04-19 Screening for disease has become a widely accepted concept in health care Screening in Disease Prevention takes a critical look at the practice of screening throughout the various stages of life The book highlights three current challenges the increasing consumer media and commercial focus on health in general and screening in particular providing accurate and understandable information and tackling the continuing variation in the uptake of screening between different areas of the country and different socio economic groups Screening in Disease

Prevention is important reading for public health professionals particularly those involved in screening programs Policy makers and shapers medical researchers pressure groups and support organizations for people with screenable conditions will also find it a valuable reference      Motherhood, Absence and Transition Trish Green,2016-04-15 The vast majority of

academic texts on motherhood have focused on women s experiences of the early years of mothering while texts covering the topic of home leaving have tended to privilege the young person s experience Combining lively empirical material with an illuminating social theoretical framework Trish Green s book addresses the much neglected area of the mother s experience of separation from her child at the time of their home leaving The book makes clear how the mother s experience of separation is silenced first by the socio cultural constructions of motherhood per se second by the privileging of the child s transition to adulthood and third by a neglect of the relational dimension of this particular life course transition In doing so the book makes an important contribution to debates on ageing identity and the life course and will be of great interest to

**The Claims of Parenting** Stefan Ramaekers, Judith Suissa, 2011-09-15 Many sociological, historical, and cultural stories can be and have already been told about why it is that parents in post-industrial western societies face an often overwhelming array of advice on how to bring up their children. At the same time, there have been several philosophical treatments of the legal, moral, and political issues surrounding issues of procreation, the rights of children, and the duties of parents, as well as some philosophical accounts of the shifts in our underlying conceptualization of childhood and adult-child relationships. While this book partly builds on the insights of this literature, it is significantly different in that it offers a philosophically informed discussion of the actual practical experience of being a parent, with its deliberations, judgements, and dilemmas. In probing the ethical and conceptual questions suggested by the parent-child relationship, this unique volume demonstrates the irreducible philosophical richness of this relationship and thus provides an important counterbalance to the overly empirical and largely psychological focus of a great deal of parenting literature. Unlike other analytic work on the parent-child relationship and the educational role of parents, this work draws on first-person accounts of the day-to-day experience of being a parent in order to explore the ethical and epistemological aspects of this experience. In so doing, it exposes the limitations of some of the languages within which contemporary parenting is conceptualized and discussed and opens up a space for thinking about childrearing and the parent-child relationship beyond and other than in terms of the languages which dominate the ways in which we generally think about it today.
