The SAGE Handbook of Qualitative Data Analysis Uwe Flick, 2013-12-18 The wide range of approaches to data analysis in qualitative research can seem daunting even for experienced researchers. This handbook is the first to provide a state-of-the-art overview of the whole field of QDA from general analytic strategies used in qualitative research to approaches specific to particular types of qualitative data, including talk, text, sounds, images, and virtual data. The handbook includes chapters on traditional analytic strategies such as grounded theory, content analysis, hermeneutics, phenomenology, and narrative analysis, as well as coverage of newer trends like mixed methods, reanalysis, and meta-analysis. Practical aspects such as sampling, transcription, working collaboratively, writing, and implementation are given close attention, as are theory and theorization, reflexivity, and ethics. Written by a team of experts in qualitative research from around the world, this handbook is an essential compendium for all qualitative researchers and students across the social sciences.

Metalinguistic Performance and Interlinguistic Competence David Birdsong, 2012-12-06 It is often assumed that metalinguistic performance e g detection of ambiguity judgments of grammaticality straightforwardly reflects linguistic knowledge The inadequacies of such an assumption are explored in this volume which documents the subtleties of the relationship between metalinguistic performance and knowledge of a second language interlinguistic competence from the perspectives of language acquisition theory and cognitive and developmental psychology This thorough and up to date examination of metalinguistic phenomena offers insight to those involved in designing elicitation materials analyzing and interpreting metalinguistic performance data and applying such evidence to descriptions of interlanguage grammars and to second language acquisition theory The book also contributes constructively to the current debate concerning the role of metalinguistic variables in second language acquisition that is how they ultimately affect success or failure in learning a second language
