**Assessment in Higher Education** Samuel J. Messick, 2013-12-16 Assessment in Higher Education brings together in one place most of the major issues confronting higher education in the 1990s These include enhancing student access development and success in higher education transforming admissions testing to meet expanding educational needs resolving the politics of accountability by assessing quality outcomes of higher education assuring fair assessment responsive to human diversity and facing the technological future of higher education An integrative thread that weaves through all of these issues is the concept of equity especially as it bears on social justice in education and on fairness in assessment Another integrative thread is the role of computer and multimedia technology not only in improving the efficiency and power of all the functions of higher education assessment but also in revolutionizing the delivery of higher education itself

*Transitions in Work and Learning* Board on Testing and Assessment, Division of Behavioral and Social Sciences and Education, National Research Council, 1997-09-19 The dramatic shift in the American labor market away from manufacturing and the growing gap in earnings between high school and college graduates have contributed to a sense of alarm about the capacity of the nation's schools to supply adequately skilled graduates to the work force The role that schools can or should play in preparing people to enter the world of work is hotly debated In an effort to nurture the important and ongoing national dialogue on these issues the Board on Testing and Assessment asked researchers

and policymakers to engage in an interdisciplinary review and discussion of available data and implications for assessment policy Transitions in Work and Learning considers the role of assessment in facilitating improved labor market transitions and life long learning of American workers It addresses the apparent mismatch between skill requirements of high performance workplaces and skills acquired by students in school the validity of existing assessment technologies to determine skills and competencies of persons entering various occupations and ethical and legal issues in the implementation of new testing and certification programs The book also examines the role of assessment in determining needed skills developing ongoing education and training and providing information to employers prospective workers and schools

The Nature of Mathematical Thinking Robert J. Sternberg, Talia Ben-Zeev, 2012-10-12 Why do some children seem to learn mathematics easily and others slave away at it learning it only with great effort and apparent pain Why are some people good at algebra but terrible at geometry How can people who successfully run a business as adults have been failures at math in school How come some professional mathematicians suffer terribly when trying to balance a checkbook And why do school children in the United States perform so dismally in international comparisons These are the kinds of real questions the editors set out to answer or at least address in editing this book on mathematical thinking Their goal was to seek a diversity of contributors representing multiple viewpoints whose expertise might converge on the answers to these and other pressing and interesting questions regarding this subject The chapter authors were asked to focus on their own approach to mathematical thinking but also to address a common core of issues such as the nature of mathematical thinking how it is similar to and different from other kinds of thinking what makes some people or some groups better than others in this subject area and how mathematical thinking can be assessed and taught Their work is directed to a diverse audience psychologists interested in the nature of mathematical thinking and abilities computer scientists who want to simulate mathematical thinking educators involved in teaching and testing mathematical thinking philosophers who need to understand the qualitative aspects of logical thinking anthropologists and others interested in how and why mathematical thinking seems to differ in quality across cultures and laypeople and others who have to think mathematically and want to understand how they are going to accomplish that feat

*America's Army* Beth Bailey, 2009-11-01 Bailey tells the story of the all volunteer force from the 1960s through the Iraq War Based on archival research and interviews with Army officers and recruiters and executives and policy makers America's Army confronts political moral and social issues a volunteer force raises for a democratic society and for the defense of our nation *Technical Report*, 2004 The Perpetrator-Victim Relationship: An Important Clue to Understanding Intimate Partner Homicide in China Shuhong Zhao, 2022-01-15 This book is devoted to illustrating the significance of perpetrator victim relationship including its status and state in understanding intimate partner homicide IPH in the context of China today after comparing with the findings in the previous studies By analyzing the correlation between intimate relationships as a focal variable and other variables such as IPH characteristics and risk factors a deeper understanding of IPH in China today has emerged Finally this book shows that many perpetrators and victims had intimate relationships with people outside their marriages as the main reason for the rapid increase in the number of instances of IPH which seems to be in tandem with China's rapid modernization and urbanization Presenting the sole academic research that closely investigates the characteristics of intimate partner homicide in modern China the book is a valuable resource for not only for the Chinese

government but also for Chinese and international researchers

**Working Memory and Human Cognition** John T. E. Richardson, Randall W. Engle, Lynn Hasher, Robert H. Logie, Ellen R. Stoltzfus, Rose T. Zacks, 1996-05-16 This new volume in the Counterpoints series compares and contrasts different conceptions of working memory generally recognized as the human cognitive system responsible for temporary storage of information The book includes proponents of several different views Robert Logie discusses the theoretical and empirical utility of separating working memory into an articulatory loop a phonological store and a visuo spatial sketchpad into visual and spatial subsystems Patricia Carpenter provides evidence for a process view of working memory arguing that both task specific processing and general processing capabilities can account for the full range of working memory phenomena She focuses on findings from reading comprehension and memory tasks suggesting that working memory is used to represent the set of skills and strategies necessary for complex tasks while retaining residual capacity for use as a storage buffer Lynn Hasher argues in favor of the new inhibitory model with evidence drawn from the literature on aging and pathology that demonstrates parallels between memory disorders and normal memory functioning Randall Engle addresses the issue of whether working memory resources are required for retrieval of information or whether that task is relatively automatic Engle's empirical studies in turn bear directly on the positions of Carpenter Hasher and Logie As interest in working memory is increasing at a rapid pace an open discussion of the central issues involved is both useful and timely This work serves this purpose for a wide audience of cognitive psychologists and their students

**The Pursuit of Excellence Through Education** Michel Ferrari, 2001-12-01

Although specific definitions may change over time few goals are considered more important to education than the pursuit of academic excellence There are many different viewpoints on this issue today among educational psychologists and other social scientists One particularly glaring fault line in the debate divides those who emphasize developing individual learning and those who focus on promoting cultural and institutional reform These two perspectives are rarely addressed in a single volume In this book well known theorists and researchers present a range of perspectives on how to promote excellence in education This allows those who stress transformation of educational practice and those who emphasize individual abilities to speak to each and invites readers to jointly consider the arguments for both positions or for some synthesis of the two The point is to consider how these two divergent viewpoints can be reconciled or simply coordinated in an effort to benefit both students and society at large The main thesis is that excellence can be fostered without sacrificing equity both of which are fundamental tenets of a democratic education The issues addressed in this book have implications and relevance for school reform efforts and across the fields of educational psychology curriculum and instruction philosophy of education and educational leadership The volume provides a unique source for students and teachers in various disciplines who want to gain a broader and more integrated view of the nature and development of excellence through education

**Multidisciplinary Perspectives on Multilingualism** Simona Montanari, Suzanne Quay, 2019-10-08 Multilingualism is a typical aspect of everyday life for most of the world's population it has existed since the beginning of humanity and among individuals of all backgrounds Nonetheless it has often been treated as a variant of bilingualism or as a phenomenon unique to individual areas of study The purpose of this book is to review current knowledge about the acquisition use and loss of multiple languages using a multidisciplinary perspective highlighting the common themes and stimulating insights that can emerge when multilingualism is viewed from different but related areas of investigation The chapters focus on research evidence showing that multilingualism is a complex phenomenon that involves a myriad of linguistic and extra linguistic forces and that should be studied in its own right as evidence of human potential and capacity for language The book is primarily addressed to students and scholars interested in deepening their understanding of the different facets of multilingualism including the individual and societal circumstances that contribute to it the cognitive and neural mechanisms that make it possible and the dynamics involved in the acquisition use and loss of multiple languages
