The Ideology of Competition in School Music Sean Robert Powell, 2023 The Ideology of Competition in School Music explores competition as a structuring force in school music and provides critiques of that system from multiple philosophical and theoretical perspectives Competition is seen by many music teachers students and supporters as natural and inevitable a taken for granted aspect of music education or an irresistible force rather than a choice This book uncovers this ideological nature of competition and examines its effect on student learning teacher agency and equity within music education It considers ways in which music educators might reconsider the role of competition in their teaching practice and offers alternative frameworks for organizing school music In this book author Sean Robert Powell views competition as a microcosm of the wider neoliberal capitalist society in which subjects are interpellated in an antagonistic competitive field as market logic dictates a system of accountability reduction and audit culture Music teachers students and education administrators consciously and unconsciously reinforce replicate and sustain the competitive structure even if they do so while expressing a cynical disavowal Powell considers competition broadly including for example formal competitions

between schools in which ensembles are given numerical scores and ranked festivals in which groups are given ratings based on pre given criteria state regional and national honor ensembles hierarchical arrangements within school music programs or simply the pursuit of social prestige reputation and ever higher performance standards Although the book provides examples from the competitive landscape of school music in the United States and especially Texas considered a hyper example of competitive culture Powell s analyses and discussions are relevant to readers in any context around the world Although the degree to which competitive achievement as an explicitly stated aim of instruction varies from program to program and location to location the realism of neoliberal capitalism and its effect on all aspects of education is a global phenomenon **Catalogue of the University of Texas** University of Texas,1912 **On Teaching Band: Notes from**
