Textbook Of Clinical Medicine For Asia:

Principles and Practice of Clinical Medicine in Asia Joseph Jao Yiu Sung, Lawrence K. S. Wong, Philip K. T. Li, 2002

This book is a new and improved revision of the Textbook of Clinical Medicine for Asia. It is ideal as a standard medical text for students and physicians in Asia as well as a reliable resource for physicians and researchers involved in treating Asians in the West. The book aims to outline approaches to the diagnosis and treatment of medical conditions that are common to the region or its peoples. Each chapter includes an introduction to the basic concepts and current status in a medical specialty such as cardiology, gastroenterology, neurology, and rheumatology. The chapters are based on local practice and regional expertise with statistics and experience unique to the Asia Pacific region. Thus, the book reflects the knowledge and experience of the disease patterns in the region.

Textbook of Clinical Medicine for Asia Joseph Sung, 1998. Most textbooks of clinical medicine are written by authors in Western countries. Asia has 60% of the world's population, and the disease pattern in this region is in many aspects quite different from that of the West. Textbook of Clinical Medicine for Asia is written by a group of local experts in Hong Kong. While it is based on Western medicine, this book places particular emphasis on diseases prevalent in Asia, e.g., IgA nephropathy, recurrent pyogenic cholangitis, thyrotoxic periodic paralysis, and many other infections. The use of herbal drugs and their possible toxic effects are also included. Designed primarily for use by medical students and trainees in internal medicine, the book should also be an interesting reference for physicians who practice in Asia as well as physicians in the West who occasionally see Asian patients.
