Children's and Young People's Nursing E-Book Edward Alan Glasper, James Richardson, 2010-05-19 This popular textbook is aimed at children's nurses in a wide range of practice settings including primary ambulatory and tertiary care. Covering the full age and specialty spectrum, this text brings together chapters from among the best known children's nurses in the UK. It describes family-centred child healthcare drawing upon practice throughout the UK and further afield. This innovative text provides up-to-date information on a wide range of topics. Each chapter offers readers additional material on Evolve. Full Microsoft PowerPoint presentations that facilitate interactive learning augment the written chapters and provide information not normally possible in a standard textbook, e.g. colour photographs, video clips. Although intended for nurses, the book adopts an interprofessional problem-solving and reflective approach aimed at students, practitioners and child health educators. Material is offered from levels 1, 3 and some of the ancillary material extends into the postgraduate arena. Each chapter offers readers additional material on an Evolve website. Full Microsoft PowerPoint presentations augment the written chapters and provide extra information that includes case studies, moving image photographs and text. Aims, objectives, learning outcomes, a summary box in each chapter and key points assist learning and understanding. Professional conversation boxes enliven the text on the page and make it more interesting to dip into. Suggestions for seminar discussion topics to help teachers. Case studies help to relate theory to practice. Prompts to promote reflective practice. Activity boxes, suggested visits. Evidence-based practice boxes which highlight key research studies. Annotated bibliographies including details of web sites and full contemporary references to the evidence base. Resource lists including recommended web site addresses. New chapter on blood disorders of childhood. New material on caring for young people and transitions in care. More on childhood eczema, childhood and adolescent mental health, solid tumours of childhood.

Practices in Children's Nursing E-Book Ethel Trigg, Toby Mohammed, Louise Ford, Hermione Montgomery, Vicky Vidler, 2010-06-17 The skills required by children's nurses are many and varied and are undertaken in a variety of settings. Sick children are cared for at home, in children's units and hospitals and sometimes in adult wards. In addition, children with disabilities may need nursing care while at special schools or in residential settings. This book provides a clinical manual of common practices. Each practice is research-based and presented in a common format which covers Objectives, Rationale, Factors to note, Guidelines, Positioning, Equipment, Method, Special observations and possible complications, References and further reading. The guidelines have been written specifically for children's nursing by contributors from well-known children's units. They are not simply adaptations from adult practices and therefore recognise the unique differences between adult and children's nursing. The introductory section covers common concepts and infection control. There is also a chapter on complementary therapies and an appendix on the use of play as a distraction. All hospital and community nurses dealing with children, whether at home, in specialised units or in community settings, will find the book of great practical help. The common format of each practice makes the book easy to use and refer to in a clinical setting. Each practice is based on the latest research to ensure it is evidence-based and up-to-date.

Introductory chapters cover issues common to all practices to make the book easier to use The appendix on play reinforces its common usage as a distraction technique A chapter on complementary therapies explains these as they are becoming more widespread All practices have been reviewed by regional centres to avoid parochialism Content reorganised to reflect the Essential Skills Clusters from the NMC New chapter on communicating with children All chapters updated to reflect the current evidence base
