American Sectionalism in the British Mind, 1832-1863 Peter O'Connor,2017-11-13 In *American Sectionalism in the British Mind 1832 1863* Peter O Connor uses an innovative interdisciplinary approach to provide a corrective to simplified interpretations of British attitudes towards the United States during the antebellum and early Civil War periods Exploring the many complexities of transatlantic politics and culture O Connor examines developing British ideas about U S sectionalism from the abolition of slavery in the British Empire and the Nullification Crisis in South Carolina to the Civil War Through a close reading of travelogues fictional accounts newspaper reports and personal papers O Connor argues that the British literate population had a longstanding

familiarity with U S sectionalism and with the complex identities of the North and South As a consequence of their engagement with published accounts of America produced in the decades leading up to the Civil War the British populace approached the conflict through these preexisting notions O Connor reveals even antislavery commentators tended to criticize slavery in the abstract and to highlight elements of the system that they believed compared favorably to the condition of free blacks in the North As a result the British saw slavery in the U S in national as opposed to sectional terms which collapsed the moral division between North and South O Connor argues that the British identified three regions within America the British Cavalier South the British Puritan New England and the ethnically heterogeneous New York and Pennsylvania region and demonstrates how the apparent lack of a national American culture prepared Britons for the idea of disunity within the U S He then goes on to highlight how British commentators engaged with American debates over political culture political policy and states rights In doing so he reveals the complexity of the British understanding of American sectionalism in the antebellum era and its consequences for British public opinion during the Civil War

American Sectionalism in the British Mind 1832-1863 re conceptualizes our understanding of British engagements with the United States during the mid nineteenth century offering a new explanation of how the British understood America in the antebellum and Civil War eras

The Great Irish Potato Famine James S Donnelly, 2002-11-01 In the century before the great famine of the late 1840s the Irish people and the poor especially became increasingly dependent on the potato for their food So when potato blight struck causing the tubers to rot in the ground they suffered a grievous loss Thus began a catastrophe in which approximately one million people lost their lives and many more left Ireland for North America changing the country forever During and after this terrible human crisis the British government was bitterly accused of not averting the disaster or offering enough aid Some even believed that the Whig government's policies were tantamount to genocide against the Irish population James Donnelly's account looks closely at the political and social consequences of the great Irish potato famine and explores the way that natural disasters and government responses to them can alter the destiny of nations
