Tutor Quest Edward E. Gordon, 2002 Advice and guidelines for finding tutors for adults and children Competing for Knowledge Robert Huggins, Hiro Izushi, 2007-08-09 As yet little is understood about how the knowledge based economy differs from the old traditional economy Digesting up to date cross disciplinary thinking this significant volume provides an account of the transformation of advanced economies Global Leadership Marshall Goldsmith, Cathy Greenberg, Alastair Robertson, Maya Hu-Chan, 2003-04-28 The follow up to Marshall Goldsmith's 500 000 copy bestseller The Leader of the Future Global Leadership The Next Generation systematically identifies what tomorrow's leaders will need to know do and believe in order to successfully lead the global enterprise of the future Drawing on the results of an extraordinary 2 year

Accenture study of emerging business leaders this book shows why the skills of today's global leaders won't be enough and why tomorrow's leaders won't resemble today's Goldsmith and his co-authors first identify five new factors of leadership and their implications: global thinking, appreciation of diversity, technological savvy, a willingness to partner, and an openness to sharing leadership. They explain what it will mean to lead in an era where intellectual capital is the dominant source of value, how to lead people whose backgrounds and values may be radically dissimilar from yours, and why achieving personal self-mastery is now a fundamental prerequisite for leading others. From the evolution of federated, semi-autonomous organizational structures to the personal leadership challenges now arising from globalism, this book offers unprecedented insights into the new challenges of leadership and what it will take to meet them.

*Handbook of Defence Politics* Isaiah "Ike" Wilson III, James J.F. Forrest, 2011-03-28 Issues of defence politics and policy have long been at the forefront of political agendas and defining of international affairs. However, the dramatic changes to the global system that have taken place since the end of the Cold War and particularly since the terror attacks on the USA on 11 September 2001 have amplified the world's attention toward political and policy issues of national, regional, and global security. The focus of this volume is on examining the fundamental causes of and defence policy responses to this new post-9/11 security environment. Edited by Isaiah Ike Wilson III and James J.F. Forrest of the US Military Academy, West Point, USA, this volume is international in scope, with pieces written by experts in the field offering a collection of up-to-date and balanced insights on key contemporary issues of concern to defence policymakers. The book will be an invaluable reference tool for academics and students, researchers in international relations, policymakers, media professionals, and government officials.

**Future Jobs** Edward E. Gordon, 2018-03-05 A pervasive disconnect exists between the job/career culture and the present economic reality in America. This book offers powerful strategies for stemming the employment crisis and proposes comprehensive solutions for businesses, government, and job seekers alike. America's low unemployment rate overshadows the fact that more than 20 million Americans are still unemployed. Moreover, more than eight million jobs are vacant because employers cannot find qualified candidates. It is projected that if this imbalance between available positions and skills is not quickly addressed, more than 14 million jobs will be vacant by 2020, and that many more people will be out of work. In *Future Jobs*, historical economist Edward E. Gordon explains how increasingly complex technologies, global demographic shifts, and outdated education to employment systems are converging and may imminently cause a labor market crisis. How can we ensure that enough people possess the skills necessary to holding the jobs of today and tomorrow? This book points to a solution gaining traction across the United States: Regional Talent Innovation Networks (RETAINs), alliances of businesses, educators, government agencies, and nonprofit organizations that successfully bridge the talent gap. Additionally, it provides information on the most promising jobs and careers of the next decade for early-career job seekers and for workers who are looking to change career paths.
