*Resources in Education* , 2000-10      **Class Degrees** Evan Watkins, 2009-08-25 A current truism holds that the undergraduate degree today is equivalent to the high school diploma of yesterday But undergraduates at a research university would probably not recognize themselves in the historical mirror of high school vocational education Students in a vast range of institutions are encouraged to look up the educational social scale whereas earlier vocational education was designed to cool out expectations of social advancement by training a working class prepared for massive industrialization In *Class Degrees* Evan Watkins argues that reforms in vocational education in the 1980s and 1990s can explain a great deal

about the changing directions of class formation in the United States as well as how postsecondary educational institutions are changing. Responding to a demand for flexibility in job skills and reflecting a consequent aspiration to choice and perpetual job mobility, those reforms aimed to eliminate the separate academic status of vocational education. They transformed it from a cooling out to a heating up of class expectations. The result has been a culture of hyperindividualism. The hyperindividual lives in a world permeated with, against all odds, plots from beat the odds of long supermarket checkout lines by using self checkout and buying FasTrak transponders to beat the odds of traffic jams to the endless superheroes on film and TV who daily save various sorts of planets and things against all odds. Of course a few people can beat the odds only if most other people do not. As choice begins to replace the selling of individual labor at the core of contemporary class formation, the result is a sort of waste labor left behind by the competitive process. Provocatively, Watkins argues that in the twenty-first century academic work in the humanities is assuming the management function of reclaiming this waste labor as a motor force for the future.

**The Wiley Blackwell Handbook of the Psychology of Training, Development, and Performance Improvement** Kurt Kraiger, Jonathan Passmore, Nuno Rebelo dos Santos, Sigmar Malvezzi, 2020-06-02. This Handbook is sure to become a key resource for any researcher or professional looking for the latest and most innovative thinking from around the world on the full range of topics related to training, development, and performance management. Bradford S. Bell, PhD, Cornell University, USA, Editor, Personnel Psychology. I wish I could have accessed this book many years ago. Comprehensive and scholarly, the four sections—training, e-learning, personal and professional development, and performance management—fit well together and address a gap in the literature that has been apparent for some time. The psychological perspective speaks to growing interest in the micro-foundations of strategic success, and the blending together of both formal and informal perspectives on learning in organizations ensures a holistic rather than piecemeal approach to the question of how to build individual knowledge, skills, and competences in organizations. I believe that this book will make a significant impact on its target audience in this critical area.

Helen Shipton, Professor of International Human Resource Management, Nottingham Trent University, UK. *The Wiley Blackwell Handbook of the Psychology of Training, Development, and Performance Improvement* provides up-to-date contemporary information for researchers and professionals by reviewing the latest literature and research in the interconnected fields of training, development, and performance appraisal. It brings a psychological perspective to bear on a multidisciplinary field that links to management, human resources, and education. Unique to reference works in this area, it maintains a truly global focus on the field with top international contributors looking at research and practice from around the world, including South America, Europe, Canada, and Australia, as well as the United States and the United Kingdom. The chapters cover a diverse range of

important contemporary topics such as needs analysis job design active learning self regulation simulation approaches 360 degree feedback and virtual learning environments Together they offer researchers and professionals essential information for building a talented organization a critical and challenging task for organizational success in the twenty first century
