Sacred books of the Hindus ,1915 Revival: Thought and Reality - Hegelianism and Advaita (1937) Poolla Tirupati Raju,2018-07-27 This work is a contribution to certain aspects of idealistic philosophy It is a comparative study yet it is not a comparison for the sake of comparison This book examines the supra rational Absolutism of the West developed under the Hegelian influence and in the light of the criticisms shows the peculiar character of the Advaita Vedanta of Sankara It is therefore not a mere exposition but a criticism and construction The discussions are not cosmological but epistemological and metaphysical approached from the side of logic The work may also be viewed as a reorientation of Sankara s system It places Sankara s philosophy in line with the idealistic philosophies of the West so that we can understand the peculiarities of the former in terms of the latter It thus discovers or brings into clearer light the guiding principle of Sankara s thought It brings out the full significance of the principles of non contradiction applied by Sankara as a test of truth and reality and shows its difference from the same principle as understood by Hegel and the Hegelians The aim of this work is to attempt at laying the metaphysical foundation of the logic of supra rational Absolutism the interpretation of Advaita is based mostly on polemical works

Parallels between Science & Religion and

Philosophy & Science BK Jagdish Chander, It has become almost a fashion for those who write and speak on Religion or Philosophy to quote certain reputed scientists and to give some parallels from Science especially Physics in an attempt to make religious views easily acceptable to scientists and rationalists It is also becoming a favourite choice or even a pastime of an increasing number of scientists especially those who had an exposure to the oriental thought to give parallels from ancient mythology mysticism or religious concepts of the cosmos and consciousness either with the avowed object of widening the field of that science or showing the overlapping areas between the two fields or sometimes even for the dubious purpose of covering up the blurred nebulous or mystic nature of their scientific concepts The writer of this small book has only elementary knowledge in the field of science and is a mere ordinary student of religion and philosophy and has absolutely no claim to any erudition or in depth understanding of many advanced theories of science and formulations of mathematics and deep and profound religious concepts He considers himself only a lay person who has his own interest in both the fields so as to widen his horizon of understanding and he applies only commonsense to comprehend what the writers or speakers in anyone of these fields write or say He would not have therefore ventured to enter a field which even the angels are afraid to tread but he thought that it would be better if even a feeble voice is raised or view is recorded to point out that certain scientific theories which are being oft quoted to support a religious dogma do not in fact support it The author may be wrong in what he has expressed in the following pages and would in that case beg an apology from the more knowledgeable readers but the chances are that he is right and he would be satisfied if he has done a service
