remote sensing geoinformation systems Today very well developed terminologies of all the specialist fields of geography and related subjects exist in the main world languages However they are not always well correlated Nowadays geographical terminology requires unification and international correlation more than ever before Hence the idea of compiling a multilingual polydisciplinary dictionary The Dictionary consists of the basic table of terms arranged according to the order of the English alphabet with each term numbered Each entry consists of the term in English and its equivalents in Russian French German Spanish Short definitions of terms are given in English and in Russian The terms are supplied with the necessary grammar labels such as gender of nouns plural number etc The Dictionary combines two functions that of a defining dictionary and that of a bilingual dictionary These two functions are basically contradictory because usually the defining dictionary is aimed at giving one meaning of the word which is the main and essential one while the bilingual dictionary tries to give different equivalents of a given word in the other language in order to supply the user with maximum possible translations differing in the shades of meanings thus giving him the possibility to choose the appropriate word But in our Dictionary we intentionally decided to combine the two functions defining and multilingual because a short definition of the term and equivalents in other languages help to achieve our main aim which consists in showing the basic geographical terminology and harmonizing it in several languages Having this into consideration we deliberately mixed two types of dictionaries in one Organized alphabetically via English Provides short definition of geographical terms in English and Russian Includes multilingual translation of terms from English to Russian French German Spanish

Derecho y turismo Francisco Javier Melgosa, 2005

Lengua y comunicación en el español del turismo Maria Vittoria Calvi, 2006

El presente trabajo se propone analizar en una perspectiva pragmático discursiva el lenguaje que se ha desarrollado en el sector profesional del turismo Se parte de una caracterización de este lenguaje de acuerdo con las situaciones en las que se

emplea desde el nivel más especializado reservado a las relaciones entre los profesionales a la comunicación que de forma directa o mediada está dirigida al público. A continuación se delinean las propiedades de las principales clases de textos turísticos: guías, folletos, catálogos, anuncios publicitarios, etc. Luego se pasa a describir las realidades implicadas en la lengua del turismo: economía, geografía, historia, arte, gastronomía, etc. y los procedimientos más utilizados para la creación de neologismos subrayando el uso connotativo de algunos vocablos funcional al acto comunicativo. Por último se afronta el análisis de los mecanismos lingüísticos que configuran las propiedades del discurso turístico tanto desde el punto de vista de la relación entre el emisor y el destinatario como por lo que se refiere a la ponderación del producto turístico. De acuerdo con los planteamientos pedagógicos de la colección el cuadernillo afronta de forma clara y sencilla el marco teórico de referencia proporcionando muchos ejemplos de uso pertenecientes a un amplio corpus de textos reales. Al mismo tiempo, dada la escasez de estudios sobre el lenguaje del turismo, el volumen pretende ofrecer un enfoque original de esta importante parcela del español con fines específicos.
