

A photograph of a dirt road winding through a forest. The trees on either side have vibrant autumn foliage in shades of orange, yellow, and red. The road leads towards a bright, hazy light at the end of the path, creating a sense of depth and perspective. The overall mood is peaceful and contemplative.

The Future: A Very Short Introduction Jennifer M. Gidley, 2017-03-16 From the beginning of time humans have been driven by both a fear of the unknown and a curiosity to know We have always yearned to know what lies ahead whether threat or safety scarcity or abundance Throughout human history our forebears tried to create certainty in the unknown by seeking to influence outcomes with sacrifices to gods preparing for the unexpected with advice from oracles and by reading the stars through astrology As scientific methods improve and computer technology develops we become ever more confident of our capacity to predict and quantify the future by accumulating and interpreting patterns from the past yet the truth is there is still no certainty to be had In this Very Short Introduction Jennifer Gidley considers some of our most burning questions What is the future Is the future a time yet to come Or is it a utopian place Does the future have a history Is there only one future or are there many possible futures She asks if the future can ever be truly predicted or if we create our own futures both hoped for and feared by our thoughts feelings and actions and concludes by analysing how we can learn to study the future ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable
