Day, T.A. Lambo, 2013-12-14 Dr Oliver Wendell Holmes was once asked When should the training of a child commence A hundred years before birth was the reply Indeed it is this perspective on life through posterity that underlies the maturing field of international health embracing as it does a responsibility for and an awareness of the needs of all peoples The concepts of international health are increasingly revitalizing modern medicine as it attempts to relieve mankind of the burden of disease Curative medicine once the paradigm took a relatively beneficent approach to treatment But epidemiological recognition of the frequency of disease on a global basis and an appreciation of the vast number of those afflicted evoked a humiliating backlash of awareness that curative medicine alone neither constrains disease nor permanently advances human health happiness or longevity The growing reliance on truly international health strategies by national and international agencies including the more definite and extended practice of preventive medicine has provided the means to achieve significant gains in the quality of health in

years to come A redeeming feature of contemporary failures in science and medicine is that once intelligently studied analyzed and evaluated even these failed efforts may provide real insights that can mold our capacity and determination So it is that more than in any bygone age the past ten years have seen the implementation of a sound and systematic infrastructure for international health undertakings thus paving the way for improved health for all

The Organisation of Crime and Harm in the Construction Industry Jon Davies, Hanna Malik, 2024-04-30 Drawing on empirical work and secondary analysis from the UK and Finnish construction industries this book contributes a deep rooted analysis of construction industry harms that originate from corporate industrial state processes The UK context arguably represents a classic neoliberal system categorised by privatisation of services and minimal regulation whereas Finland broadly provides a social democratic alternative with its relatively strong national regulation and public sector oversight of industry These concepts interlink strongly with the notion of state corporate crime since this perspective shifts attention away from individualistic explanations for crime and harm towards symbiosis between states and corporations This book argues that existing explanations based on organised crime and individual rogues are insufficient to account for the wider range and subtlety of harms that occur in construction and therefore offers a unique perspective into organisational industry and state dynamics in this sector An accessible and compelling read this book will appeal to students and scholars of criminology sociology organized crime and those interested in harms in the construction industry
