Social Constraints On Energy Policy Implementation:

The Social Constraints on Energy-policy Implementation Max Neiman, Barbara J. Burt, 1983 Collection of essays on social implications economic implications and political aspects of energy policy in the USA in the light of a federal economic policy examines the impact of market structure and economic concentration on the use of alternative energy sources solar energy electric power etc discusses public opinion regarding energy conservation and the need to reduce power consumption because of increasing population density includes an economic analysis of petroleum and gas leasing schemes References

Energy Abstracts for Policy Analysis ,1984-07 **Perspectives on Management Capacity Building** Beth W. Honadle, Arnold M. Howitt, 1986-01-15 Perspectives on Management Capacity Building provides a lively spectrum of views on the problems and prospects of improving the management and performance of municipal governments in the United States Leading specialists in public administration probe the management needs of local governments and explore ways in which they can improve their capacity to manage Today state and local governments are caught in the transition between the expansionism of the post World War II years and the retrenchment era of the late seventies and eighties Improved management capacity has emerged as the most effective way for local governments to ride out the economic and political pressures confronting them This book first investigates the meaning of the term management capacity It then considers how management needs have changed in the post war period and how these needs vary among large cities suburbs and rural communities Two of the contributions explore the organizational politics of management improvement while others look at the functional areas of computers and financial management The book also addresses human resource problems such as labor relations management development and training of municipal legislators and concludes with several viewpoints on federal efforts to improve local management capacity **Energy** Joseph Russell Rudolph, 1995 A road map for the novice researcher contemplating the broad field affected by and concerned with energy *Contemporary Issues in African Administration and Development Politics* ,1990 **Energy Policy Design in the Eastern Mediterranean Basin** Bertug Ozarisoy, Hasim Altan, 2023-09-28 This book explores energy consumption and thermal comfort in the social housing sector in the Eastern Mediterranean basin This book presents a novel methodological framework for the optimisation of post war social housing developments in the Eastern Mediterranean climate The authors draw on semi structured interviews to present evidence on in situ thermal sensation and provide the results of walk through and walk in thermographic surveys to highlight building fabric performance and highlight anomalies in the building envelopes The authors go on to show how this data informed retrofit design solution can be applied to reduce household energy consumption increase awareness of domestic energy use and inform effective policymaking decisions in energy use in the Eastern Mediterranean basin including the development of Energy Performance Certificate schemes This book will be of great interest to students and scholars of energy policy energy efficiency and planning It will also assist architects building engineers and other practitioners in closing

the gap between the current understanding and the actual performance of existing residential building stocks in the Eastern Mediterranean basin **ERS Staff Report** ,1994 **Regulatory Choices** Richard J. Gilbert,2023-11-15 *Regulatory Choices* offers the first comprehensive economic history of energy policy and its consequences for California where some of the most innovative and far ranging programs of regulatory reform have originated The authors of this volume have gathered together an impressive wealth of material about actual policy decisions and their repercussions and have subjected their findings to astute economic analysis This book will serve for years to come as an invaluable reference on the costs and effects of various energy policies With its focus on bringing prices in alignment with the true cost of producing power and delivering it to the customer the first part of the book outlines the issue of setting utility rates and considers some of the proposals to provide regulated industries with incentives to respond to economic and environmental concerns The problems of energy supply occupy the second part of the book which includes a survey of the costs of alternative energy sources and estimates of their environmental impacts as well as a case study of the construction of the Diablo Canyon nuclear power plant The book concludes by documenting the results of subsidy programs that were designed to target the development of wind power and residential energy conservation Regulators we learn have a mixed record when it comes to managing the production of energy Some conservation programs have enjoyed considerable economic success particularly those that correct a lack of consumer information Others such as the renewable energy tax credits or programs designed to subsidize new technologies have cost much more than the value of the energy they have saved What emerges clearly from this study is that regulated industries are not immune from the forces of competition This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1991 *State & Local Government Review* ,1985 **Elgar Encyclopedia of Energy Economics** Angeliki Menegaki,2025-05-14 This prescient Encyclopedia outlines the breadth and depth of the burgeoning field of energy economics Entries cover a wide range of topics including traditional and renewable energy sources environmental impacts energy efficiency market structures and the economic implications of energy transitions This title contains one or more Open Access chapters **Encyclopedia of Global Warming and Climate Change, Second Edition** S. George Philander,2012-06-13 The First Edition of the Encyclopedia of Global Warming and Climate Change provided a multi authored academic yet non technical resource for students and teachers to understand the importance of global warming to appreciate the effects of human activity and greenhouse gases around the world and to learn the history of climate change and the research enterprise examining it This edition was well received with notable reviews Since its publication the debate over the advent of global warming at least partially brought on by human enterprise has continued to ebb and flow depending literally on the weather politics and

media coverage of climate summits and debates Advances in research also change the discourse as new data is collected and new scientific projects continue to explore and explain global warming and climate change Thus a new Second Edition updates more than half of the original entries and adds new perspectives and content to keep students and researchers up to date in a field that has proven provocatively lively **Energy Research Abstracts** ,1979 **Bulletin of the Atomic Scientists** ,1983-08 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world Interactions of Energy and Climate W. Bach,J. Pankrath,J. Williams,2012-12-06 Since the beginning of industrialization in the last century a steady increase in energy consumption can be observed At the same time energy generation switched from wood and coal to predominantly oil coal and natural gas Soon many countries became aware of the fact that the resources of fossil fuels especially of oil and natural gas are finite Diversification of energy sources became a requirement for the future Governments expressed their concern by setting up natural energy programmes while international organisations undertook assessments of the global energy resources and possible rates of supply and substitution When it comes to setting up energy policies the following factors must be taken into consideration population growth level and nature of socio economic activity the costs of energy the adequacy and reliability of supply the availability of technology and supporting infrastructure the success of energy conservation programmes and concern about the environment safety aspects of production and use of energy as well as educational efforts toward a rational use of energy When we express our most urgent concern the long term global energy provision experts offer four interrelated partial strategies the strategy of rational use and conservation of energy the strategy of using renewable energy sources the coal strategy including coal gasification and liquefaction the nuclear power strategy Any strategy however for securing future energy supply has from my point of view to be thoroughly examined as to its impact on the environment **Symposium** ,1985 **Research Anthology on Clean Energy Management and Solutions** Management Association, Information Resources,2021-06-25 Energy usage and consumption continue to rise globally each year with the most efficient and cost effective energy sources causing huge impacts to the environment In an effort to mitigate harmful effects to the environment implementing clean energy resources and utilizing green energy management strategies have become worldwide initiatives with many countries from all regions quickly becoming leaders in renewable energy usage Still not every energy resource is without flaws Researchers must develop effective and low cost strategies for clean energy in order to find the balance between production and consumption The Research Anthology on Clean Energy Management and Solutions provides in depth research that explores strategies and techniques used in the energy production field to optimize energy efficiency in order to maintain clean and safe use while delivering ample energy coverage The anthology also seeks solutions to energy that have not yet been optimized or are still produced in a way that is harmful to the environment Covering topics such as hydrogen

fuel cells renewable energy solar power solar systems cost savings and climate protection this text is essential for electrical engineers nuclear engineers environmentalists managers policymakers government officials professionals in the energy industry researchers academicians and students looking for the latest research on clean energy management Decisions for Sustainability Thomas Dietz,2023-06-08 Decisions by individuals organisations and nations shape the well being of humans and other species the environment and sustainability Decisions for Sustainability examines how we can make better decisions concerning our future It incorporates sociological psychological and economic perspectives to highlight our strengths and weaknesses in decision making and suggest strategies to influence both individual and societal decisions Sustainability challenges from local land use and toxic contamination to climate change and biodiversity loss illustrate how we can improve decision making and what factors lead to conflict How we use science in the face of uncertainty is also examined and a range of ethical criteria for good decisions are proposed Emphasizing the need for diversity in decision making and clarifying the relationship between reform and societal transformation this book provides a comprehensive view of what we know about decision making and how we can do better in the face of sustainability challenges Engendering the Energy System Joy Clancy,2025-02-13 This book brings together a comprehensive overview of gender and energy to provide an invaluable resource for researchers and practitioners It addresses how energy access at the individual household community level is gendered in terms of decision making and where and how benefits accrue At the institutional level it examines the role women play in the sector and the barriers they have to overcome to participate At the policy level experiences with mainstreaming gender into energy policy are discussed The book provides examples from both the Global South and the Global North and is set in the context of the energy transition The book is a timely publication that highlights the global energy initiatives of SEforAll the SDGs and the Paris Agreement on Climate Change *Solar Energy Update* ,1983-09 **Energy Efficiency** Jenny Palm,2010-08-17 Global warming resulting from the use of fossil fuels is threatening the environment and energy efficiency is one of the most important ways to reduce this threat Industry transport and buildings are all high energy using sectors in the world and even in the most technologically optimistic perspectives energy use is projected to increase in the next 50 years How and when energy is used determines society s ability to create long term sustainable energy systems This is why this book focusing on energy efficiency in these sectors and from different perspectives is sharp and also important for keeping a well founded discussion on the subject
