*The Spotted Hyena* Hans Kruuk, 1972      **The Spotted Hyena: A Study of Predation and Social Behavior** Hans Kruuk, Senior Principal Officer Nerc Hans Kruuk, 2014-09-30 In this seminal study Hans Kruuk redefines the image of the spotted hyena not as a common scavenger but as a complex matriarchal predator with links to human evolution *The Spotted Hyena* is the first study to capture the true behavior and ecology of these formidable predators who instinctively adapt their social structure to meet their ecological needs Kruuk's research reveals for the first time that hyenas combine carnivorous habits with group territoriality thus drawing parallels between their existence and that of wolves lions and arguably early humans In addition to being lovable rogues spotted hyenas are sophisticated hunters that live in complex communities of up to 80 animals Covering more than broad facts about this species Kruuk addresses the vital questions concerning hyena behavior such as why females are dominant why lions scavenge from hyenas why hyenas hunt zebra and wildebeest differently and how their social behavior correlates with ecology Since its original publication *The Spotted Hyena* has transformed the common perception of the spotted hyena With nearly 2 000 citations in scientific literature *The Spotted Hyena* has become a classic work and trailblazer for linking changes in animal behavior with the environment in addition to its concentration on a large carnivore that shares several characteristics with select primates Although this is a science book Kruuk skips the jargon and complicated theory thus making its conclusions easily accessible to any student of natural history African predators or social behavior within animal communities *The Spotted Hyena* features exciting field notes in addition to comprehensive graphs and tables that have made it an invaluable contribution to behavioral ecology and its methodology Hans Kruuk studied hyenas while living in the wilderness of Africa's Serengeti and Ngorongoro Crater for many years After completing his doctorate with Nobel Prize winner Niko Tinbergen at the University of Oxford Kruuk was asked by the former Tanganyika now Tanzania National Parks to study predation in the Serengeti Kruuk focused on the most important carnivore there the spotted hyena and co founded the Serengeti Research Institute in Tanzania to carry out his research Many years later in 1997 he retired emeritus from his position as Senior Principal Research Officer at the Institute of Terrestrial Ecology in Banchory Scotland Kruuk has carried out research projects on mammals and birds on all continents published seven books and over 120 scientific papers Among his awards are scientific medals from the Zoological Society of London and British Mammal Society and secondary Doctorate of Science from the University of Aberdeen where he is also Honorary Professor

cognition but also crystallize collective efforts to protect wild chimpanzee populations and ensure appropriate care in captive settings With a breadth of material on cognition and culture from the lab and the field *The Mind of the Chimpanzee* is a first rate synthesis of contemporary studies of these fascinating mammals that will appeal to all those interested in animal minds and what we can learn from them **Zooarchaeology and Modern Human Origins** Jamie L. Clark, John D.

Speth, 2013-07-11 Recent genetic data showing that Neanderthals interbred with modern humans have made it clear that deeper insight into the behavioral differences between these populations will be critical to understanding the rapid spread of modern humans and the demise of the Neanderthals This volume which brings together scholars who have worked with faunal assemblages from Europe the Near East and Africa makes an important contribution to our broader understanding of Neanderthal extinction and modern human origins through its focus on variability in human hunting behavior between 70 25 000 years ago a critical period in the later evolution of our species Research Beyond Borders Lise-Hélène Smith, Anjana

Narayan, 2011-12-28 This collection draws insights from an interdisciplinary group of scholars who specialize in diverse methods ranging from ethnography archival research and oral histories to quantitative data analysis and experiments used in the social sciences and humanities to reflect on the empirical methodological and practical implications of conducting research beyond one's national borders The goal of this book is to help researchers contemplate existing orientations that dominate current research processes and consider the need for transnational multidisciplinary practices that remain aware of the inequalities which continually inform research practices With this focus this collection is also a resourceful initiative that seeks to share experiences as well as extract key ideas and approaches likely to overlap or resonate in different disciplines *Sex and Gender Effects on Power, Status, Dominance, and Leadership - An Interdisciplinary Look at Human*

*and Other Mammalian Societies* Charlotte Korinna Hemelrijk, Joey T. Cheng, Elise Huchard, Peter M. Kappeler, Tanja Hentschel, Jenny Veldman, 2024-02-20 Unequal power and status between the sexes usually translates into one sex monopolizing valuable resources and exercising control at the expense of the other These inequalities not only have negative consequences for the fitness and wellbeing of the underpowered sex but also hinder the path to peaceful and prosperous societies Intersexual power refers to an asymmetry in the degree of control that one sex exerts over the other It can arise for example from sex differences in social dominance i.e. imposed by threat or force leverage i.e. conferred by the possession of a resource that cannot be taken by force such as knowledge or fertilizable eggs motivation and in humans in particular social norms and privileged positions in society Evolution, Gender, and Rape Cheryl Brown Travis, 2003 Explains the flaws and limitations of a strictly biological model of rape and argues that traditionally stereotyped gender roles are grounded more in culture than in differing biological reproductive roles back cover
