Spouse Abuse A Treatment Program For Couples:

Treating Couples Gerald R. Weeks, 2013-05-24 In some ways the development of the theory and practice of marital therapy seems like a relative newcomer to those clinicians who practice systems therapy Most of the books in the field stress the total family as the unit of treatment in terms of understanding the dynamics of family interactions and intervention techniques For the past 15 or 20 years clinicians interested in systems work sought training in family therapy programs and at family therapy workshops This training led to a dramatic shift in the practice of psychotherapy away from the individual as the unit of treatment to the family Much less emphasis has been given to the marital dyad or couple as the unit of treatment

Handbook of Couple Therapy, Fourth Edition Alan S. Gurman, 2008-06-24 This authoritative handbook provides a

definitive overview of the theory and practice of couple therapy. Noted contributors, many of whom developed the approaches they describe, combine clear conceptual exposition with thorough descriptions of therapeutic techniques. In addition to presenting major couple therapy models in step by step detail, the book describes effective applications for particular populations and problems. Chapters adhere closely to a uniform structure to facilitate study and comparison, enhancing the book's utility as a reference and text. See also *Clinical Casebook of Couple Therapy*, also edited by Alan S. Gurman, which presents in depth illustrations of treatment.

Handbook of Prescriptive Treatments for Adults, Robert T. Ammerman, Michel Hersen, 2013-11-11. This book could not have been conceptualized or published 20 years ago. Indeed, it is doubtful that we could have organized the material for this handbook 10 years ago. Over the last 20 years, however, the painstaking efforts of many clinical researchers working with a variety of resistive psychopathologies have resulted in specific psychotherapies and pharmacotherapies that are effective with a significant proportion of patients at least for some of the disorders. Much clinical research remains to be carried out in the forthcoming decades. But now that we are nearing the 21st century, at least some statement about efficacy can be made. In 1967, Gordon Paul succinctly stated that the ultimate goal of treatment outcome research is to determine what treatment by whom is most effective for this individual with that specific problem and under which set of circumstances. p. 111. At that time, empirical evaluations of psychosocial and pharmacologic treatments were few and far between. Methodological strategies for determining treatment effectiveness were also in the formative stage, as exemplified by introduction of control groups that received inactive interventions, i.e., placebo, and the relatively recent practice of comparing two or more treatments in addition to placebo. In the almost three decades since Paul's oft-quoted dictum, both the quantity and the quality of treatment outcome research with adults have increased dramatically.

Spouse Abuse, Peter H. Neidig, Dale H. Friedman, 1984. A thoroughly tested treatment program designed to be used with individual couples or groups of couples. Offers a skill building training format that utilizes 40 interrelated behavioral and written exercises. The book includes reproducible worksheets, contracts, and self-monitoring forms.

The Military Family, James Martin, Leora Rosen, Linette Sparacino, 2000-07-30. Today there are more military family members than there are total uniformed service members. Sixty percent of the military are married, including more than eighty percent of all career status personnel, and many have small children. They come from diverse racial and ethnic backgrounds and they represent a wide variety of family types, including single parents, dual career military couples, and families with eldercare responsibilities. In an effort to cut costs, many of the services utilized by military families are being privatized or outsourced to civilian service providers. This guide is designed to benefit anyone who provides services to these families, particularly those who may have little or no prior knowledge of the unique nature of military families and military family life. This book contains research-based information about the unique needs of military families across various duty-related conditions, as well as within the context of military career demands. Its multi-service focus addresses the provision of human services in both peace and

wartime Topics include military spouse employment retirement issues family support during deployments the New Parent Support Program and the experiences of adult children of military parents The authors encourage an understanding of military community based programs and services and they offer the reader numerous resources for collaboration with the military community
