SR 71 Blackbird the fastest manned aircraft in the history of aviation The SR 71 Blackbird the famed spy jet was deliberately
designed to be the world s fastest and highest flying aircraft and its success has never been approached since It was
conceived in the late 1950s by Lockheed Martin s highly secret Skunk Works team under one of the most possibly the most
brilliant aero designers of all time Clarence Kelly Johnson Once fully developed in 1964 the Blackbird represented the apogee
of jet powered flight It could fly at well over three times the speed of sound above 85 000 feet and had an unrefueled range of
3 200 nautical miles It flew with great success until 1999 Despite extensive use over Vietnam and later battlefields not one
was ever shot down unlike the U2 in the Gary Powers incident The Blackbird s capabilities seem unlikely ever to be exceeded
It was retired because its function can be performed by satellites and in today s steady trend toward unmanned military
aircraft it is improbable that another jet aircraft of this speed and caliber will ever again be conceived
