Spying With Maps Surveillance Technologies And The Future Of Privacy:

Spying with Maps Mark Monmonier, 2004-04 Maps as we know help us find our way around But they re also powerful tools for someone hoping to find you Widely available in electronic and paper formats maps offer revealing insights into our movements and activities even our likes and dislikes In Spying with Maps the mapmatician Mark Monmonier looks at the increased use of geographic data satellite imagery and location tracking across a wide range of fields such as military intelligence law enforcement market research and traffic engineering Could these diverse forms of geographic monitoring he asks lead to grave consequences for society To assess this very real threat he explains how geospatial technology works what it can reveal who uses it and to what effect Despite our apprehension about surveillance technology Spying with Maps is not a jeremiad crammed with dire warnings about eyes in the sky and invasive tracking Monmonier s approach encompasses both skepticism and the acknowledgment that geospatial technology brings with it unprecedented benefits to governments institutions and individuals especially in an era of asymmetric warfare and bioterrorism Monmonier frames his explanations of what this new technology is and how it works with the question of whether locational privacy is a fundamental right Does the right to be left alone include not letting Big Brother or a legion of Little Brothers know where we are or where we ve been What sacrifices must we make for homeland security and open government With his usual wit and clarity Monmonier offers readers an engaging even handed introduction to the dark side of the new technology that surrounds us from traffic cameras and weather satellites to personal GPS devices and wireless communications Spying with Maps Mark S.

Monmonier, 2002 **Spying with Maps** Mark Monmonier, 2002-11-15 In Spying with Maps the mapmatician Mark Monmonier offers readers an engaging evenhanded introduction to the dark side of the technology from traffic cameras and weather satellites to personal GPS devices and wireless communications 7 halftones Line drawings *Privacy-Invasive Technologies and Privacy by Design* Demetrius Klitou, 2014-07-05 Privacy invading technologies PITs such as Body scanners Public space CCTV microphones Public space CCTV loudspeakers and Human implantable microchips RFID implants GPS implants are dealt with in this book The book shows how and why laws that regulate the design and development of privacy invading technologies PITs may more effectively ensure the protection of privacy than laws that only regulate data controllers and the use of such technologies The premise is supported and demonstrated through a discussion on these four specific PITs as case studies In doing so the book overall attempts to explain how laws regulations that mandate the implementation of Privacy by Design PBD could potentially serve as a viable approach for collectively safeguarding privacy liberty and security in the 21st Century This book will be of interest to academic researchers law practitioners policy makers and technology researchers *The Intensification of Surveillance* Kirstie Ball, Frank Webster, 2003-09-20 Our public and private lives are under surveillance as never before Whether we are shopping with a credit card walking down the street or emailing a colleague at work our activities are closely monitored Since September 11th 2001 surveillance has intensified

further Yet although individuals groups governments and states are more closely monitored our security is not assured This book explores the vast range of issues related to increased surveillance What is going on in an area clouded by secrecy from the state and complacent reassurances from corporations How do we track suspects and combat crime without also eroding our civil liberties and sacrificing our rights to privacy Does electronic tagging of prisoners work What are retailers up to with lifestyle profiling Focusing on these and other issues such as paedophilia money laundering information warfare cybercrime and related legislation this book spotlights benefits and costs of surveillance and suggests how it is likely to develop in the future

The Bengal Borderland Willem van Schendel, 2005 The Bengal Borderland constitutes the epicentre of the partition of British India Yet while the forging of international borders between India Pakistan Bangladesh and Burma the Bengal Borderland has been a core theme in Partition studies these crucial borderlands have remarkably been largely ignored by historians

Writing and Translating Francophone Discourse Paul F. Bandia, 2014-01-01 This book is a much needed contribution to interdisciplinary research on the intersection of French and Francophone Studies and Translation Studies It highlights the symbiotic relationship between the two disciplines whereby theories and concepts developed in translation studies provide useful models and paradigms for studying francophone literature while major concepts that hold sway in the francophone world provide a solid basis for elucidating and understanding translation phenomena The book is at once a contribution to the growing field of postcolonial francophone studies and the sub area of postcolonial translation theory Contributors are experts from a variety of disciplines and hail from various regions across the globe What unites them is their interest in translation and its conceptualization both as an interlinguistic practice and a metaphor for intercultural communication and transcultural relations The contributions draw on literature film historical documents and critical theories by French and francophone thinkers highlighting the significance of translation for African Caribbean and migrant francophone discourse

Licensing Geographic Data and Services National Research Council, Division on Earth and Life Studies, Board on Earth Sciences and Resources, Committee on Licensing Geographic Data and Services, 2004-11-13 Geographic data are used in all sectors of society to support a huge range of applications ranging from emergency response to land use planning to location based services In the past government agencies typically acquired ownership of such data from private sector and other data producers and distributed these data without restriction Licensing whereby the producer may restrict redistribution has emerged as an alternative business model that agencies must now consider among a suite of procurement options The report highlights licensing perspectives and experiences of major stakeholder groups and examines the pros and cons of licensing It concludes that licensing may be a viable option in some instances and advises agencies on how to best serve societal interests

The Power of Knowledge Jeremy Black, 2014-01-14 Information is power For more than five hundred years the success or failure of nations has been determined by a country's ability to acquire knowledge and technical skill and transform them into strength and prosperity Leading historian Jeremy Black approaches global history

from a distinctive perspective focusing on the relationship between information and society and demonstrating how the understanding and use of information have been the primary factors in the development and character of the modern age Black suggests that the West's ascension was a direct result of its institutions and social practices for acquiring, employing and retaining information and the technology that was ultimately produced. His cogent and well-reasoned analysis looks at cartography and the hardware of communication, armaments and sea power, mercantilism and imperialism, science and astronomy as well as bureaucracy and the management of information, linking the history of technology with the history of global power while providing important indicators for the future of our world. *Handbook on Geographies of Technology* Barney Warf, 2017-02-24 This Handbook offers an insightful and comprehensive overview from a geographic perspective of the numerous and varied technologies that are shaping the contemporary world. It shows how geography and technology are intimately linked by examining the origins, growth and impacts of 27 different technologies and highlighting how they influence the structure and spatiality of society.
