Housing Policy Innovation in the Global South Paavo

Monkkonen, 2020-06-29 Housing problems have become increasingly complex in the Global South. An increased pressure to upgrade older stock to provide adequate infrastructure and bring city amenities to urban peripheries compounds the continued need for new housing of a decent standard. This comprehensive volume spans nine countries simultaneously analyzing innovative housing policies and questioning the idea of innovation in this arena. The authors describe three persistent global challenges to contemporary policy: the inherent difficulty in mass producing housing of decent quality with access to the city; the challenge of community based upgrading programmes which often fail to benefit those who are worst off; and the political root of housing policies which don't always consider the diverse needs of populations at the expense of the least powerful. This volume raises questions about what many consider the two most successful areas of housing policy in the Global South: the community based land sharing programmes for redevelopment in South East Asia and the finance driven social housing programmes in Latin America. The authors examine mass housing production programmes, incremental development processes, community based urban upgrading, the legal structure of condominiums and land sharing policies while also highlighting challenges to policy learning across contexts. This book will be of great interest to students, researchers and those involved with contemporary housing policies particularly in the Global South. It was originally published as a special issue of the International Journal of Housing Policy.

Comparative Housing Sales and Purchase Agreements Under the Malaysia, Singapore and New South Wales Housing Laws (UUM Press) Nuarrual Hilal Md.

Dahlan, 2011-01-01 Abandoned housing projects is one of the major problems in housing industry in Peninsular Malaysia. The reasons leading to this problem are many. This catastrophe has caused multifarious problems to the stakeholders particularly the purchasers who become the aggrieved parties. To date there is no effective and once and for all means to face the problems of abandoned housing projects. One of the factors which causes abandonment of housing projects in Peninsular Malaysia is the lack of political will on part of the government to adopt an affirmative better housing delivery system such as the full build then sell system and the introduction of a housing development insurance to face the problems of housing abandonment. This book provides in depth analyses of the terms and conditions of the statutory standard sale and purchase agreements as enshrined in Schedules G, H, I and J of the Housing Development Control and Licensing Regulations 1989. The objective of this book among others is to identify the weaknesses of the terms of the agreements if any which may have contributed to the problem of abandoned housing projects and their consequential troubles. As comparative analyses the terms and conditions of the sale and purchase agreements as applicable and enforced in the Republic of Singapore and New South Wales, Australia are chosen. The purpose of these comparative analyses is to find the terms and conditions in these foreign jurisdictions agreements which can be learned and adopted in the statutory standard sale and purchase agreements Schedules G, H, I and J. It is also for the betterment of the Malaysian housing industry as a whole and to protect the interests of the stakeholders in particular the purchasers as against the problems of housing abandonment and its consequences.

Legal Issues in the Rehabilitation of Abandoned Housing Projects (UUM Press) Nuarrual Hilal Md.

Dahlan, 2011-01-01 Abandoned housing project is one of the housing problems in Peninsular Malaysia. Even though there are laws and policies provided by the Malaysian Government to control the housing industry, the abandoned housing project is still an unsettled issue for the Malaysian Government to tackle. The real victims are the purchasers themselves. There is virtually no standard common way to face the problems of abandoned housing projects. Likewise, there is no similar specific method to deal with the rehabilitation of abandoned housing projects. This is due to the fact that in every abandoned housing project and its rehabilitation, the problem and issues faced by the stakeholders vary. Thus, different methods are used to deal with the problems, especially to rehabilitate the projects. If the project is not viable for rehabilitation, the project will be stalled forever without any prospects for rehabilitation to the detriment of the purchasers. This book discusses the law and practice in rehabilitating abandoned housing projects in Peninsular Malaysia. Certain suggestions are also provided in this modest book for facing the problems of abandoned housing projects and their rehabilitation in Peninsular Malaysia and for the betterment of the housing industry in Peninsular Malaysia.
