Women and Attempted Suicide Raymond Jack, 2024-09-30

Attempted suicide began to increase inexorably in western societies following World War II. In Britain it reached epidemic proportions in 1976 when 120 000 cases were reported. More accurately termed self poisoning as the majority of cases involve deliberate non fatal overdosing on pills this remarkable social medical phenomenon remains without any generally accepted explanation. First published in 1992 *Women and Attempted Suicide* suggests that two factors have contributed to this failure: the neglect of gender issues and the influence of psychiatry on explanations of deviant behaviour. The book offers a new psycho social explanation based on the theory of Causal Attribution. This suggests that as a result of their socialization individuals differ in the causes to which they attribute their problems and that some causal attributions are more helpful than others in coping with problems. The volume argues that certain women and others such as the unemployed and underprivileged who may have limited control over their lives acquire a helpless attributional style. This renders them less able to cope with adversity more likely to turn to doctors when it befalls them and more likely to be prescribed psychotropic drugs. When pills fail to solve problems helplessness may turn to hopelessness and self poisoning. This book will be of interest to students and researchers in many disciplines and particularly of psychology, medical sociology and women studies.

Battered Women as Survivors Lee Ann Hoff, 2016-05-12. First published in 1990 this book is based on a field study of domestic abuse victims and their social network members. In a life history perspective using values and network analysis it uncovers the social context of a secret crime against women and reveals the relationship between personal crisis and traditional attitudes toward women, marriage, the family and violence. This book breaks new ground by redirecting attention beyond victim blaming and the medicalization of violence to understanding domestic abuse victims as survivors who manage multiple crises despite public inattention to their plight. From analysis of the women's struggles with violence and its aftermath this book proposes a new crisis paradigm which underscores the sociocultural aspects of crisis originating from violence. This book will be of interest to those studying social sciences, women's studies, social work, health and mental health professions.

The Gender of Suicide Katrina Jaworski, 2016-03-09. Drawing on diverse theoretical and textual sources *The Gender of Suicide* presents a critical study of the ways in which contemporary society understands suicide, exploring suicide across a range of key expert bodies of knowledge. With attention to Durkheim's founding study of suicide as well as discourses within sociology, law, medicine, psychology, knowledge and newsprint media this book demonstrates that suicide cannot be understood without understanding how gender shapes it and without giving explicit attention to the manner in which prevailing claims privilege some interpretations and experiences of suicide above others. Revealing the masculine and masculinist terms in which our current knowledge of suicide is constructed *The Gender of Suicide* explores the relationship between our grasp of suicide and problematic ideas connected to the body, agency, violence, race and sexuality. As such it will

appeal to sociologists and social theorists as well as scholars of cultural studies philosophy law and psychology **A**

Psychology of Hope Kalman J. Kaplan, Matthew B. Schwartz, 2008-10-07 Combines the disciplines of history and psychology to explain the suicidal element in Western culture and how to treat it **Routledge Library Editions: Domestic Abuse**

Diane Miller Sommerville, 2018-09-25 More than 150 years after its end we still struggle to understand the full extent of the human toll of the Civil War and the psychological crisis it created In *Aberration of Mind* Diane Miller Sommerville offers the first book length treatment of suicide in the South during the Civil War era giving us insight into both white and black communities Confederate soldiers and their families as well as the enslaved and newly freed With a thorough examination of the dynamics of both racial and gendered dimensions of psychological distress Sommerville reveals how the suffering experienced by Southerners living in a war zone generated trauma that in extreme cases led some Southerners to contemplate or act on suicidal thoughts Sommerville recovers previously hidden stories of individuals exhibiting suicidal activity or aberrant psychological behavior she links to the war and its aftermath This work adds crucial nuance to our understanding of how personal suffering shaped the way southerners viewed themselves in the Civil War era and underscores the full human costs of war *Current Issues of Suicidology* Hans-Jürgen Möller, Armin Schmidtke, Rainer Welz, 2012-12-06 Contributions from the First European Symposium on Empirical Research into Suicidal Behavior Held March 19 22 1986 in Munich Initiated by Arbeitsgemeinschaft zur Erforschung Suizidalen Verhaltens with Deutsche Gesellschaft für Selbstmordverhütung **Women and Suicidal Behavior** Silvia Sara Canetto, 1995 This volume fills a major gap in the literature on suicide and contrasts with previous works that have addressed suicidal behavior in women from a male perspective In the past researchers have focused on suicide mortality a less frequent and typically male phenomenon and from that have drawn conclusions about nonfatal suicidal behavior a more frequent and typically female phenomenon In an effort to avoid inherent research biases in suicidology this book critically reviews the most current research on suicide and women from a woman's perspective The contributors consider the social and cultural factors involved including age related and ethnic issues and also provide useful intervention strategies This volume is a worthy addition to the libraries of clinicians academics and students concerned with the psychology of women suicide and death studies **Southern California**

Feminist Perspectives on Wife Abuse Kersti Yllo,Michele Bograd,1988-04 Why do men batter their wives How do women define their experiences of violence Does a relationship exist between wife abuse and child abuse What responses do medical authorities have toward wife abuse A first of its kind this provocative volume brings together a well known group of academicians activists and clinicians from a variety of disciplines who approach these questions from a distinctly feminist perspective Their research is based upon the premise that gender inequality is the source of violence against women and that the social institutions of marriage and family are special contexts that may promote maintain and even support men s use of physical force against women In addition they critically analyze lay and academic theories of wife abuse in order to develop theories that more accurately reflect the experiences of women Feminist Perspectives on Wife Abuse has a number of strengths It challenges most explicitly the ideology of the safe home offers excellent critiques of the methodology of family violence research and considers the politics of research It is the only book under review that gives as much attention to the question of why men assault as it does to how women respond It also emphasizes methods clinical practice and how to bridge research and practice I especially recommend Feminist Perspectives on Wife Abuse for courses on methods I have used it there with great success Gender Society Must be on the bookshelf of every serious thinker in the family violence area Richard J Gelles University of Rhode Island Neatly balanced between research and practice this volume addresses the challenge of how we can maintain a feminist perspective in our work with battered women The major strength of this book is its self reflective nature The book goes beyond critiques by addressing the complexity of bringing feminism into research and practice and presenting ways in which it can be dealt with It also demonstrates the great rewards that result from addressing this complexity rather than trying to manage it or ignore it AFFILIA All researchers clinicians and advocates concerned with wife abuse should consider the questions and issues raised by this volume Violence and Victims This is a well written book Many of the contributors are well known researchers in the area of family violence The volume is also amazingly coherent for an edited book Each of the chapters complements the others and there is little overlap of material Feminist Perspectives on Wife Abuse is highly recommended Contemporary Psychology For clinicians this book offers strong messages with an emphasis on empowerment of women suggesting that women are not simply helpless victims but are able to make their own decisions with appropriate intervention strategies Furthermore this book has shown the integration between feminist theories and practice The current trend toward the battered women s shelter movement and various domestic abuse

intervention programs is demonstrated as a result of strong advocates whose interests correspond with feminist philosophies and beliefs This book delivers strong messages to everyone who is concerned about and involved in wife abuse and challenges current perspectives on wife abuse Sociological Inquiry Valuable resource for teaching and research It would be appropriate for courses in research methods feminist theory criminology social work or upper level courses on family violence National Women s Studies Association This book shows how good an anthology can be Isis Feminist Perspectives on Wife Abuse is a thought provoking and valuable anthology of feminist research and activism as they relate to the study and eradication of wife abuse As the title implies this book does not join in the current movement of tiptoeing around the issue of wife abuse by erroneously referring to it as spouse abuse domestic violence or family violence On the contrary this is a collection of fifteen excellent contributions by feminist women and pro feminist men who are not afraid to offer truly feminist perspectives on male violence against their intimate partners The two chapters most relevant to community psychologists address how psychological test can misdiagnose and or misrepresent the experiences of women with abusive partners In short Feminist Perspectives on Wife Abuse is thought provoking and challenges the reader to examine her or his motives and biases to put theories into practice to create lasting social change and to work collaboratively with grassroots activists who bring their own expertise and skills to the task of ending male violence against women The Community Psychologist

Psychiatric Illness Across the Menstrual Cycle Leah Susser, Liisa Hantsoo, Lauren M. Osborne, 2025-02-25 Menstrual cycle related exacerbations of psychiatric illnesses and premenstrual disorders are prevalent and associated with significant morbidity While menstrual cycle related exacerbations are common and for certain disorders have been associated with severity and with poorer treatment response the field remains largely understudied We currently know little about the specific patterns of exacerbation for most psychiatric illnesses and how to treat them Premenstrual disorders have gained more attention in research however many women do not respond to the currently available treatments and novel pharmacotherapies are needed This Research Topic aims to further our knowledge and recognition of both menstrual cycle related exacerbations and of psychiatric illnesses limited to certain phases of the menstrual cycle Research is needed on prevalence patterns across the menstrual cycle and the characteristics pathophysiology and treatment of these menstrual cycle related conditions **Uniform Trade List Annual** ,1977 People in Crisis Lee Ann Hoff, 2001 Written by a pioneer in the field of community mental health this updated edition of a classic crisis counseling resource helps prepare health care professionals and volunteers to work with the most vulnerable members of society victims of crime the homeless battered wives victims of environmental threat and immigrants An ideal book for those in social work
